EXPLANATION OF STOCK AND BOND TABLES.

1. Prices of the most Active Stocks and Bonds are given in the "Bankers' Gazette," previously. Full quotations of all other securities will be found on preceding pages.

2. Government Securities, with full information in regard to each issue, the periods of interest payment, size or denomination of bonds, and numerous other details, are given in the U.S. Debt statement published in Tuz Chronicle on the first of each month

3. City Bonds, and Bauk, Insurance, City Bairond and Gas Stocks, with quotations, will usually be published the first three weeks of each month, on the page immediately preceding this.

4. The Complete Tables of State Securities, City Securities, and Stairond and Miscellaneous Stocks and Bonds will be regularly published on the last Saturday in each month. The publication of these tables, occupying fourteen pages, requires the issue of a supplement, which is neatly stitched in with the usual edition and furnished to all regular subscribers of The Chronicle.

Alabama State Bonds.—The Washington correspondent of the Journal of Commerce says: "The Treasurer of the State of Alabama passed through here several days ago, and on the strength of his statements the correspondents of newspapers in the large citles at once telegraphed off that Alabama would not pay the July interest on her bonds. It is now ascertsined that the statement is postly to error. Alabama will meet prostly be correct. this statement is partly in error. Alabama will meet promptly the July interest on her "straight" or regular State bonds, but owing to failure of the purchasers of the Alabama and Chat owing to failure of the purchasers of the Alabama and Chattanooga Railroad to consummate their purchase bargain with the State, the July interest on the railroad bonda guaranteed by the State will not be paid. This is quite a disappointment to Alabamians. During the war that State sent gold through the blockade to pay European holders of State bonds, and her credit has always been guarded with a jealous eye. It was distinctly understood that the English purchasers of the Alabama and Chattanooga Railroad from the State would fulfill their contract, but their default threw Alabama into the position above tract, but their default threw Alabama into the position above indicated. It is believed, however, that the neglect to pay the interest will be temporary, and will be remedied when the Legislature meets. It should be understood that this default does not affect any of the regular Alabama State loans or June interest on the railroad indorsements, as provision has been made and payments on those liabilities will be promptly met."

Louisiana State Finances.—A dispatch (June 4) from the Auditor of Louisiana says: "The amount requisite to pay all the January and February interest on the bonded debt of the State was deposited in the Louisiana National Bank, fiscal agent of the State, some days since. Injunctions were issued by the courts restraining payment of certain series of coupons. This may cause delay, but the money is in the hards of the fiscal agent, and as soon as the injunctions are taised it will be paid.

"CHARLES CLINTON, Auditor."

.....\$30,500,000

Illinois Central Railroad.—A shareholders' meeting was held in the City of Chicago, May 28, 1873. The minutes of the meetings of the Board of Directors, held since the last annual meeting of shareholders, were submitted, approved and confirmed. The following resolutions were passed:

The following resolutions were passed:

Resolved. That the agreements made by the Directors of the Illinois Central Railroad Company with the New Orleans, Jackson and Great Northern and the Mississippi Central Railroad Companies, and the engag mente made to recure the completion of the latter railway, connecting Cairo with New Orleans, be and are hereby confirmed, adopted and approved; and Whereas, The early completion of this line to New Orleans is a work of great necessity; and

Whereas, It is helieved to be the best means for an outlet for the surplus products controlled by the Illinois Central lines, therefore this meeting recommends even more decided measures to secure all the funds necessary for its early completion, and this meeting believes that this purpose will be best attained by extending to thirty years the present agreement on the part of the Illinois Central Railroad Compuny, to purchase at a price, not exceeding par, from the six millions of bonds issued by the above named two companies to an extent not less than \$200,000 for each year, which substitution is recommended by this meeting.

The act of the Board of Directors of April 16, 1873, providing

The act of the Board of Directors of April 16, 1873, providing for the increase of the capital stock of the company from \$25,500, 000, hy a further issue of shares to the extent of twenty per cent upon subscriptions by shareholders, upon the stock registered in their names on the 15th day of June next was unanimously

approved.
In connection with the foregoing the President submits the

following statement:

The Directors have ordered \$290,000 to be added to the sum of \$2,761,500 now in the "sinking fund," which, with the interest to accrue before the maturity of the bonds, will discharge the con-

atruction mortgage debt.
With this adjustment the \$38,546,356 l1 is represented by 

 Redemption bonds due 1st April, 1875....
 \$2,500,000

 Redemption 6 per cent currency bonds, due 1st April, 1890...
 2,500,000

 And stock...

The company held January 1st obligations for \$1,472,562 15 on contracts for lands sold, and had 344,368 acres of land for sale.

contracts for lands sold, and had 344,368 acres of land for sale. The original engagement with the State of Illinois atipulated that, at the expiration of ten years after the completion of the line, the unsold land should be offered at public sale. The company considers that it has fully complied with this requirement, but in view of the feeling entertained in the State, and the recent action of its Legislature, it is desirable to close out these lands, even at a sacrifice, to av. id any difference with the State authorities upon this subject. Pending negotiations for about 300,000 acres of this land will probably be concluded upon terms which will aid in providing for the redemption bonds due in 1875. will aid in providing for the redemption bonds due in 1875.

Pacific Mail Steamship Company.—At the annual meeting of the stockholders of the Pacific Mail Steamship Company, held in New York last week, President Stockwell issued a report of May 1, 1873. In August last a contract was effected with the Post-office department at Washington for the performance of additional mail service between the United States and China and Japan. This involved a necessity for the construction of new steamers, two of which, first-class in all respects, are now under construction at a cost of \$2,200,600. It is believed that the Government subsidy of \$1,000,000 per annum, which will become available in October next, will render the steam service on the Pacific coast, which has heretofore been conducted at a loss, a source of advantage to the company. Obvious considerations induced the directory to enter into negotiations for the purchase Induced the directory to enter into negotiations for the purchase of the two Pacific coast steam lines belonging respectively to the Panama Railroad and the California Coast Companies. The transfer was effected on favorable terms. The Panama company's line was composed of four iron and one wooden screw ateamer; the California Coast line consisted of three side-wheel and one acrew steamer, all of wood. The purchase was advantageous to the interests of the Pacific Mail Company, and has led to an extension of local business which will soon require larger and swifter steamers on the service. The company sustained heavy and unusual losses during the year in the wards. sustained heavy and unusual losses during the year in the wreck of the steamers "America," "Sacramento," "Gautemala," and the "Bienville" (chartered). These losses reduced the fleet below the number of ships necessary to perform the general service. The laws of the country not permitting the empl yment of foreign-built bottoms under the United States flag, the company was debarred from accountry to the English under the proof foreign-built bottoms under the United States flag, the company was debarred from recourse to the English market, where suitable vessels could have been economically purchased. There were no steamers in this country adapted to the company's wants that were purchasable, until the failure of Corgress to subdition the New Zealand Steamship Line, established by Mr. Webb, rendered it necessary to discontinue that service. Those steamers have been since purchased, and are being fitted for service, thus enabling the company to prepare other of its slips for the additional trans-Pacific mail service to be begun in October next. The financial statement and account of the value of steamers

The financial statement and account of the value of steamers building was given in THE CHRONIBLE of May 31, on page 716.

The following are additional details:

Memoranda of Steamers Building.

CHINA LINE.—Two iron screw steamships of about 5,000 tons each; aggregate cost, ready for sea, \$2,200,000. The first of these will be completed about January next, and the second in March following.

following.

NEW YORK AND SAN FRANCISCO LINES.—Four iron screw steamers of about 3,000 tons each; aggregate cost, ready for sea,

about \$1,800,000.

Of these the "Colon" is now in service, and the three others, the "Colima," "Acapulco" and "Granada," will be completed in

July, August and September, respectively.

CENTRAL AMERICAN AND MEXICAN LINE.—Two iron screw steamers of about 1,500 tons each. Aggregate cost, ready for sea, \$500,000. These will be ready for sea in September and October.

Chesapeake & Ohio Canal.—The annual meeting of the stockholders of the Chesapeake & Ohio Canal Company was held June 2 at Annapolis. The forty-filth annual report of the President for the fiscal year ending the 31st of May, 1873, shows that the revenue from all sources for the year was \$454,933 78. The total expenses of operating, maintaining and improving the canal and the pay of officers during that period was \$209,487 72, 'eaving a net revenue for the year of \$245,446, which, with the balance in the treasury from the preceding year of \$52,308 48, beaves for the payment of the floating debt and interest on preferred construction bonds \$303,754 48, which is accounted for by total payments on account of debt during the year of \$259,325 44, showing a balance in the treasury June 1, 1873, of \$44,429 01. The revenue for the past year shows an increase over 1871 of \$54,859 67, and over 1872 of \$6,549 93. The appropriation here-tofore made on account of interest on pre'erred construction bonds was sufficient to pay the entire amount due up to and including coupons falling due January 1, 1857.

#### Kansas Paclfic Railway .-

(Returns for the Fiscal Year ended December 31, 1872.)

The Kansas Pacific Railway was chartered under the name of the Union Pacific Railroad, Eastern Division, by an act of Congress approved July 1, 1862, and amendments thereto approved July 2, 1864, July 3, 1866, March 3, 1869, &c.

By a joint resolution, approved March 3, 1869, the company were authorized to change their corporate name, as heretofore existing, to that of the "Kansas Pacific Railway Company."

The result of the above legislation has been the construction and equipment of 672.6 miles of railroad and telegraph, and the acquisition by the company of a land grant, aggregating upwards of 6,000,000 acres. On the other side, the company have issued \$9,638,950 of capital stock, and mortgaged their roads and lands for \$27,981,350, of which amount \$478,000 have been cancelled, and \$27,503,350 remains. The total of stock and bonds now standing against the company is \$37,142,300, and the cost of the railroad and its equipment has been \$35,183,274.

The road was opened to Denver Sept. 1, 1870. The Denver Pacific, which continues the Kansas Pacific, from Denver City to Cheyenne, 106 miles, and which enjoys all the muniments and privileges conceded to the other lines of the Pacific Railroads, was chartered by an act of Congress, approved June 3, 1866, and was opened for traffic in the Fall of 1870. It is controlled by the Kansas Pacific Railway Company, which own a majority of the capital stock; and is operated by it, under a contract to divide equally the gross earnings of 212 miles of the roads nearest to Denver.

On the whole, the Kansas Pacific Railway is not only to be a part of a great continental line; but like the Illinois Central Railroad must undoubtedly become the means of settlement and development for a wide country on each side of its line. What would Illinois have been to this day but for the liberal land grant which built the great road now traversing it from Cairo to Lake Michigan and the Upper Mississippi. It would have been "Egypt" still; and in like manner, Kansas and Colorado, but for the great road which connects them with civilization, would to this day have remained almost unpopulated.

## LAND DEPARTMENT.

The operations of the Land Department during the year resulted as follows: Lands sold, 68,851 acres, for \$201,567—average per acre, \$2.90; town lots sold, 53 lots; for \$1,725—average per lot, \$32.55.

The proceeds of all sales of lands are placed in the hands of the Trustees for the redemption of bonds, there being two trusts, known as the "Kansas Pacific Land Grant Trust," and the "Denver Extension Trust,"

The Kansas Pacific Land Grant Trust covers 2,000,000 acres of the lands Facine Land Grant Trust covers 2,000,000 acres of the lands lying east of the 380th mile post, and secures a mortgage of \$2,000,000, and a second mortgage of \$1,500,000.

Nett proceeds of sales of land and lots in 1872.

\$185,665

Amount previously in hands of trustees in cash and notes.

402,481 

Balance in hands of Trustees, in cash and notes.... with 1,808,366 acres of land unsold. This statement shows that the lands embraced in this trust, so far as sold (191,634 acres) have yielded an amount equal to 30 68 per cent of the first \$2,000,000 of honds, or 17 53 per cent of the whole sum, \$3,500, 000 of bonds.

The Denver Extension Trust covers 3,000.000 acres of the most westerly lands on 236 miles of road, and with the first mortgage on said 236 miles of road forms the security for the \$6,500,000 bonds, known as the Denver Extension bonds. Proceeds of sales of land for account of this trust in 1872

Boston, Hartford & Erie.—The directors of the Boston, Hartford & Erie who refuse to recognize the reorganization of that corporation under the name of the New York & New England Railroad, held a meeting lately at the house of President Fred. A. Lane, in Forty-second street, at which he resigned, and John Rooney, an inmate of his office, was elected President. These persons, connected with the old corporation, say that there is property to the value of several millions belonging to the old company. They say that the leases of the Norwich & Worcester and the Hartford & Providence Railroad as well as the Boston docks are theirs and are wrong(nlly retained by the New York and New England. They say that against these assets, if socured, there are only liabilities amounting to about \$109,000. It is understood that future litigation will be entered into for the purpose of obtaining some of the property from the new company. The new corporation, however, is confident of its strength and will contest the matter.—N. Y. Tribune.

The Northern Pacific Rallroad.—A dispatch dated Bismarck, Dakota, June 4, says: The track of the Northern Pacific Railroad reached the Missouri River at this place to-day, and the entire division of 450 miles from Dututh to Bismarck is open to business. The people are celebrating the event. Connection is made here with the navigation of the upper and lower Missouri. A line of steamers is established between this point and Fort Benton, in Western Montana, and shipments of both Government and private freight are being made by this new route to the Northwest. The railroad surveying expedition, with a military escort under command of General Stanley, will start west June 16, with the intrino of making a final and definite location of the line of the road from the crossing of the Missouri to the crossing of the Yellowstone, and along that river to Central Montana, this being the only portion of the route not yet determined. No serious opposition from Indians is anticipated by those best able te judge.

New York & Oswego Midland.—The various reports concerning the financial difficulties of this road may be reduced substantially to the following: That the company became short of funds, and was for the moment in embarrassed circumstances, and had floating obligations in the shape of notes, &c., which they were unable to meet at once. The recent stringency in the money market had the effect of rendering it almost impossible for railroads to borrow money in order to tide over temporary difficulties of this sert, and the company relied upou the placing of \$5,000,000 of first mortgage bonds of its western division—subscriptions for about half of which had already been promised—to float them quite clear of this embarrassment, and enable them to complete the fifteen miles of road now lacking to give them control of a large share of through freight. A syndicate embracing wealthy banking firms and capitalists has been formed, to whem will be given the control of the road, on condition that they subscribe for \$4,000,000 of bonds, out of which the present road and the extension to Buffalo are to be complete? Mr. George Opdyke, of New York, has been elected President, in place of Dewitt C. Littlejohn, and it is now very probable that the proposed arrangement will be carried out.

Chicago & Northwestern—Milwankee & St. Paul.—A romor that the Milwankee & St. Paul and Chicago & Northwestern RR. companies proposed to pool their earnings, induced Gov. Washburn of Wisconsin to seek information from Assistant Attorney-Gen. P. L. Spooner, a gentleman helding a high position at the bar, who has responded by asying that the proposed pool is in violation of the spirit, if not the letter, of the law of Wisconsin, and if consummated it will be the duty of the Attorney-General to apply for a writ of quo warranto against the companies in question.

Elizabethtown & Paducah Railrond Extension.—The Conrt of Appeals having settled the question of the validity of the subscription voted by the city (Loulaville) to aid in the extension of the Elizabethtown & Paducah Railroad from some point on its present line to this city, we may new reasonably expect that the work will be begun immediately and pnahed forward vigorously. If, as we are informed, the line of the road has been nefinitely located as far as the mouth of Salt River, and blds received and accepted for the greater portion of the work to that point, including the bridge across Salt River, there remains nothing to be done except to begin the work.—Courier Journal.

Atlantic and Pacific.—A dispatch from St. Louis dated June I says: "From correspondence published to day, it is learned that the Atlantic & Pacific Railroad Company, through their attorneys, have withdrawn from what was understood to be an agreed lease between them and State Attorney-General Ewing to test the constitutionality of the act of the Legislature releasing the State's lien on the Missouri Pacific Railroad. It is not improbable that the road will now be advertised for sale by Gov. Woodson, under authority of the concurrent resolution passed by the Legislature last winter."

Chleago & Alton.—A dispatch to the Chicago Tr hanc, dated Quincy, Ill., May 31, says: "Work will be commenced on Monday, extending the fine of the Quincy, Alton & St. Louis Railroad from Fall Creek to Hannibal Bridge, distance five miles. This secures the line from Texas to Chicago through this city, via the Missonri, Kansas & Texas, Quincy, Alton & St. Louis, and the Chicago, Burlington & Quincy Railroads. The work is to be completed Aug. 1."

1: Des Moines Valley Railrond.—A dispatch dated Des Moines, May 31, says: In the Polk County Circuit Court to-day a final decree was rendered in the Des Moines Valley Railrond vs. The Mortgage Bondholders. The Court ordered the road to be sold under special execution by the sheriff of Polk County. Bonds of the first and second mortgages will be received on bids, providing the purchasers will pay in cash a sufficient amount to pay the mechanic's liens and costs. The payment of the Illinols & Mississippi Telegraph Company is deferred until action is had on the second mortgage.

Georgia Railroad Company.—The annual report represents the gross receipts for the year as follows:

| From passenger earnings | \$375,839 |    |
|-------------------------|-----------|----|
| From freight earnings   | 1,222,188 | 63 |
| From mail service       | 25,838    | 64 |
| •                       |           |    |

The income derived from business to and from connecting roads West, at Atlanta, amounts to \$473,372-10, derived as follows:

 From Atlanta & West Point Railroad
 \$108,766-32

 From Mscon & Western Railroad
 2,861-20

 From Western & Atlantic Railroad
 362,243-95

Of the amount derived from the Western & Atlantic Rallroad \$137,099 63 was derived on freights to and from Rome Railroad, East Tennessee, Chattanooga, and stations on the Nashville and Chattanooga Railroad, and \$225,144 35 from Nashville and points west of that city.

Maine Central Leased to the Eastern Railroad.—The N. Y. Tribine correspondent says, under date of Portland, May 29: "One of the most important railroad transactions that has lately or perhaps ever, occurred in New England, has been begun here by the lease of the Maine Central and its branches, comprising more than 300 miles of track, to the Eastern Railroad. The next step will be the narrowing of the gange of the European and North American Railroad, and the leasing of the road by the same parties; this, it is predicted, will take place within the next 60 days. This single transaction is but one link in a great plan for a through rente from Ilalifax to New York."

St. Joseph and Benver City Railroad.—Holders of Bonds of this Company are requested to meet at the office of Hassler & Co., No. 7 Wall street, New York, Jane 11, at 3 o'clock P. M., for the purpose of taking concerted action for protecting their interests. Those not able to attend are requested to write to Hassler & Co., stating the amounts of their bonds, and whether white or yellow.

Panama Railroad.—The aggregate receipts of the Panama Railroad Company for the past four months, compared with the same period for the past two years, have been as follows:

|          | 1873.     | 1872      | 1871.        |
|----------|-----------|-----------|--------------|
| January  | \$146,481 | \$139,212 | \$91,680     |
| February |           | 137 642   | 78,959       |
| March    |           | 155,651   | 100,377      |
| April    | 133,841   | 139,681   | 105,226      |
|          | -         |           |              |

· Shepaug Valley.—A bill has passed the Connecticut LegIslature which authorizes a reorganization of the company in the interest of the second mortgage bendholders. The road extends from Litchfield, Conn., to Hawleyville, 32½ miles.

—At the election of Directors of the New York Central & Hudson River Railway Company, at Albany, Wednesday, the old officers were re-elected unanimously. There were about \$50,000,000 worth of stock represented at the election.

Quicksilver Mining Company.—The treasurer of the Quicksilver Mining Company states that an arrangement has been made between it and the New Idria Company to produce during the year ending April 1, 1874, only 34,000 flasks, the Quicksilver being restricted to 24,000 and the New Idria to 10,000 flasks. By the arrangement each company receives the market price of quicksilver instead of a price determined by contract as heretofore. Already the receipts of the Quicksilver Company have been about \$1,000 per day larger than those under the last contract the company had. The Quicksilver Company have already paid off \$410,000 of their first mortgage bonds due June 1, being all so far presented. The entire amount maturing June 1 was \$500,000.

Canton Company.—At the annual meeting of the stockholders of the Canton Land Company at Baltimore on Thursday, the following gentlemen were elected directors for the ensuing year: Messrs. Wm. Butler Duncan, Samuel L. M. Barlow, James H. Banker, J. Merteus of L. Von Hoffman & Co., J. S. Brown of Brown Brothers & Co., all of New York; Mr. Ilarrison, President of Union Railroad, Mr. Wober, and Mr. Belt, President of Corn Exchange of Baltimore.

# The Commercial Times.

# COMMERCIAL EPITOME.

FRIDAY NIGHT, June 6, 1873.

General trade has been good during the past week, and yet the same absence of spirit and confidence which has so long prevailed is still apparent. It is frequently remarked in trade circles that many staples are in such a positiou, as respects price, supply and demand, present and prospective, that in other times an active speculation would be stimulated; but now the plainest facts and the most obvious conclusions are listened to with indifference.

The following is a statement of the stocks of leading articles of domestic and foreign merchandise, at dates given:

|                           | 1372.   | 187     | 3       |
|---------------------------|---------|---------|---------|

There has been a decided advance in ocean freights, caused by the large offerings of grain for British ports. Yesterday the Liverpool steamers obtained 11½@12½d. for grain; to London, by sail, 10½@11d., and to Cork for orders 8s. 3d.@8s. 6d. Petroleum charters have been less active. To-day some further advance was paid for grain, but with little done; higher rates were not fully established.

Provisions have generally favored the buyer in regard to prices. Mess pork has been in light demand for export, but has sold to a fair extent on the spot, and for tuture delivery to home buyers; new mess selling on the spot at \$16 50 \$16 75, for June at \$16 374 \$16 50, for July at \$16 65 \$16 75, for August at \$16 874. Extra prime has sold at \$14. Western prime mess has been in light stock and prices are unsettled. Lard has been in pretty good demand, but prices have declined. Prime Western has sold at 9c. on the spot, 8c for June, 9c. for July, and 9c. for August, while new for early delivery has sold at 9c. Bacon has been in small demand, and there has been a further decline in long clear to 8c, while short clear has been neglected almost entirely. Cutmeats have been in moderate demand at prices favoring the buyers; dry salted hams have been quoted 102 11c. for short cut, with some business at the lower figure, and dry salted shoulders have been unded 72 7c. Beef has been in light home demand, and has ruled nominally steady. Butter has been in moderate demand, but at easier figures. Cheese has been in fair demaul, but prospective large receipts have given buyers the advantage, and latterly 15c. has been the highest price for export. To-day pork was in moderate demand on the spot at unchangel prices. Lard was quiet on the spot, and for June at 82 85c. with a fair business for future delivery at 95c for July, and 95c for August. Bacon and other cutmeats quiet. Butter and cheese weak.

Butter and cheese weak.

Refined petroleum has been down to 19½, in bbls., but closes a little firmer at 15½@11½c. on the spot and for early future, with cases quoted at 25@25½c., and naptha 11@11½c. in bbls. Crude has also declined to 8½c., but yesterday the sales were about 25,000 bbls, for delivery in the next fifty days at or about 9c. in bulk, with 1,000 bbls. for early delivery at 8½c. To-day the market was quiet.

Strained rosin has been dull, with a decline to \$3. Spirits turpentine rather quiet at 46½c. Tallow has been selling moderately at 8½@9c. Whiskey has been firmer at 9½@9½c. Fish oils have continued in demand, with sales of 1,000 bbls. crude sperm at New Bedford at \$1 50, and some Menbaden oil at 52½c. Hides have been in good deman!, 25½@26c. g.ld for dry Buenos Ayres, 10½@11½c. currency for city slaughter, and 19@21c. currency for dry Texas. In hops we notice a considerable movement in older growths at 10@15c.

Kentucky leaf tobacco shows rather more firmness, especially the finer grades, which are compartively scarce. The sales of the week have been about 525 hids., of which 450 hids. for export. Revised quotations for new crop sre: Lugs 7@8c., leaf 8\frac{1}{2}05c., as in quality. Seed leaf remains quiet, but is held with rather more confidence, but has been quiet; the sales, however, have been st pretty full prices, and include the following: Crop of 1870, 100 cases sundries at 9@10c.; crop of 1871, 200 cases sundries, 10 \docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\docsarrow\d

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1873, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show total values, including the value of all other articles besides those mentioned in the table.

COTTON FRIDAY, P. M., June 6, 1873.

By a social telegrams received to-night from the Sonthern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, June 6. It appears that the total receipts for the seven days have reached 25,130 bales against 30,906 bales last week, 34,044 bales the pre-25,130 bales against 30,906 bales lastweek, 34,044 bales the previous week and 41,031 bales three weeks since, making the total receipts since the first of September, 1872, 3,438,258 cales against 2,665,998 bales for the same period of 1871-72, showing an increase since September 1, 1872, of 772,260 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of the five previous years are as follows:

| Received this week at- | 1873.     | 1872.     | 1871.     | 1870.     | 1869.     | 1868.      |

The market the past week for cotton on the spot has been quiet, the quotations remaining unchanged through the week. During the last two days there has been rather more doing on spinners' account, but it is rumored that a considerable portion was good ordinary to arrive at a concession from the market price. The better grades, however, continue scarce and firm. To-day the market closed steady. For future delivery there was a steady advance until near the close of Wednesday's business. This was due in part to the reports of rainy weather in the South but in great part also to the rapid diminution of steeks through the great part also to the rapid diminution of stocks through the large shipments to Europe and the belief that an opportunity would thus be afforded soon of squeezing the bears. At the highest prices of Wednesday the following advance had been paid over the close on the previous Thursday: for June 5-16c., for July 7-16c., for August 7-16c., for September 7-16c., and for October 5-32c. higher than Saturday. Yesterday some weakness was perceptible, which was partially developed at the close of Wednesday's business; but to-day, with a fair degree of activity for the current crop, this depression was in great part recovered, and the close was firm. The total sales of this description for the week are 116,250 bales, including—tree on board. For immediate delivery the total sales foot up this week 7,900 bales, including 3,125 for export, 4,527 for consumption, 248 for speculation, and—in transit. Of the above 1,598 bales were to arrive. The following are the closing quotations great part also to the rapid diminution of stocks through the

WEATHER REPORTS BY TELEGRAPH .-- Our reports by telegraph to night show that the weather the past week has in most sections of the South been sultry and wet. In the country tributary to Memphis and Nashville, and some inland portions of the Atlantic States, there has been less rain; but with these exceptions the complaint is general, and the fight with the grass is becoming a severe one. At New Orleans the weather has continued warm, sultry and wet, with rain more than half the week. At Mobile it has also rained more than half the week; our correspondent adds that they are having too much rain, and that the grass is becoming so troublesome that crop reports are less favorable. Our Selma telegram says that it has been warm, sultry and wet there; it states also that they have had rain more than half the week, and that the grass and weeds are giving the planters much trouble. At Montgomery it has rained every day but two, and is still raining; and at Macon it has rained every day but one. Our Macon correspondent adds that the rains are excessive, so that it is impossible to keep the grass and weeds down and prevent their being troublesome. Our Columbus and Charleston telegrams are to about the same effect—rain more than half the week, and complaints of the too rapid growth of grass. At Augusta it has rained only on two days, with the weather very warm. There has been no rain at Memphis, but our correspondent states that grass is pressing the crop. At Nashville there have been frequent showers, but crop accounts are more favorable. The thermometer at Selma bas averaged 80; at Montgomery, 81; Macon, 76; Columbus, 81; Savannah, 80; and Mobile, 79.

STOCK OF COTTON HELD BY ENGLISH SPINNERS.—An article on this subject in our editorial columns will, we think, be found of interest to our readers.

ACREAGE IN COTTON.—We expected to be able to give our report of acreage to day, but the non-receipt of as full returns from Texas as we desired compels us to defer it until another week.

BOMBAY SHIPMENTS.—According to our cable dispatch received to-day, there have been 14,000 bales shipped from Bombay to Great Britain the past week and 12,000 bales to the continent, while the receipts at Bombay, during the same time have been 25,000 bales. The movement since the first of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, June 6:

|      | -Shipmenta this week to- |         |        | -Shipme  | au.1 te- |         |           |
|------|--------------------------|---------|--------|----------|----------|---------|-----------|
|      | Great                    | Con-    |        | Great    | Con-     |         | Week's    |
|      | Britain                  | tinent. | Total. | Britain. | tiaeat.  | Total.  | receipta. |
| 1873 | 14,000                   | 12,000  | 26,000 | 524,000  | 149,000  | 673,000 |           |
| 1372 | 17,000                   | 11,000  | 28,000 | 486,000  | 226,000  | 712,000 |           |
| 1871 | 30,000                   | 10,000  | 43,000 | 431,000  | 229,000  | 660,000 | 55,000    |

From the foregoing it would appear that compared with last year there is a decrease this year in the week's sbipments from Bombay to all of Europe of 2,000 bales, and that the total movement since Jan. 1 shows a decrease in shipments of 39,000 bales compared with the corresponding period of 1872. The movement since Jan. 1 and the estimated stock on the green and shoat June 6 are as follows:

|       | Stock   | Receipts      | Shipments     | Stock June 6 on |
|-------|---------|---------------|---------------|-----------------|
| Year. | Jan. 1. | airce Jan. 1. | aince Jan. 1. | green & afloat. |
| 1873  | 32,000  | 909,000       | 673,000       | 268,000         |
| 1872  | 104,000 | 811,000       | 712,000       | 203,000         |

Gunny Bags, Bagging, &c.—The market for cloth has been firm the past week, and 2,000 rolls have changed hands for future delivery on private terms; also 1,000 bales native India at 9½z, currency. The market may be quoted at 13c. cash, 15c. for future delivery of domestic bagging. There have been small sales of bags at 9½c., gold, in bond. In butts the market continnes dull and declining, with sales of 500 bales, in lots, at 1½c., cash; 250 bales at 2c., time, and 1,500 bales, to arrive, at 2c., time. India-tions point to a still lower figure. Messis. Willard, Pollard & Co., report, June 2, that the stock of d mestic bagging in New York and Boston is 70,000 rolls. Eastern mills manufacture about 10,000 rolls per month. The stock of gunny cloth is 25,000 bales, and on the way from Calcutta, 238 bales; export and consumption in May, 500 bales. Stock of gunny bags, 5,750 bales, and on the way from Calcutte, 3,350 bales; deliveries for consumption in May, 150 bales.

VISIBLE SUPPLY OF COTTON AS MADE UP BY CABLE AND TELE-GRAPH.—We give below our new table of visible supply, although we have failed to receive to day by cable some of the figures we anticipated. The continental stocks and afloat are the returns.

These figures indicate an increase in the cotton in sight tonight of 193,725 bales as compared with the same date of 1872, and an increase of 296,346 bales as compared with the correspondlng date of 1871.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipmen's for the week, and stock to-night and for the corresponding week of 1872:

|             | -Week en  | dlng June  | 7. 1873 | -Week er  | iding June | e 8, '72 - |
|-------------|-----------|------------|---------|-----------|------------|------------|
|             | Receipts. | Shipmente. | Stock.  | Receipts. | Shipment   | s. Stock.  |
| Augusta     |           | 1,372      | 7,069   | 277       | 198        | 4,587      |
| Columbus    |           | 955        | 3.843   | 35        | 867        | 842        |
| Macon       |           | 503        | 4.887   | 23        | 429        | 766        |
| Montgomery. |           | 597        | 3.608   | 44        | 389        | 1,192      |
| Selma       |           | 148        | 925     | 19        | 145        | 229        |
| Memphis     |           | 4.665      | 25,450  | 1.045     | 3.135      | 11,252     |
| Nashville   |           | 1,151      | 8,432   | 416       | 1,246      | 2,341      |
| ,           | 3,207     | 9.391      | 54.214  | 1.859     | 6,409      | 21,209     |

The above totals show that the interior stocks have decreased during the week 6,646 bales, and are to-night 33,005 bales more than at the same period last year. The receipts have been 1,348 bales more than the same week last year.

The exports of cotton this week from New York show a decrease since last week, the total reaching 9.788 bales, against 15,216 bales last week. Below we give our usual table, showing exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1872; and in the last column the total for the same period of the previous year:

# Exports of Cotton (bales) from New York since Sept. 1, 1872

Suipping News .- The exports of cotton from the United States the past week, as per lutest mail returns, have reached 54,020 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRON ICLE last Friday, except (lalveston, and the figures for that port are the exports for two weeks back. With regard to New York we include the manifests of all vessels cleared up to Wednesday night of this week :

| **                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |          |

# BREADSTUFFS.

FRIDAY P. M., June 6, 1873.

There has been a further decline in all descriptions of flour the past week, the effect, to some extent, of increased receipts, but to be attributed mainly to the persistency with which shippers and the local trade have stood aloof from the market, or insisted upon a material reduction in prices as an inducement to purchase. The decline averages fully 25c. per bbl., and at this concession the market gave very little indication of steadiness. The rapid decline in wheat, here and at the West, has had a depressing influence, though such is the poor quality of much of the spring wheat that the yield of flour per bushel is smaller than the average. To-day there was a steadier feeling, with a good business in extreme low grades; also some export demand from Great Britain at \$6 75@6 90 for good extra State, but the scarcity of ocean freights was a bar to business.

In wheat the decline has been more marked than in flour. The receipts by canal have been very large, and to add to the embar. rassments of holders, the receipts at the Western ports have latterly increased, and ocean freights have advanced. Yesterday there was a very large business, shippers taking nearly 200,000 bushels, and the lowest prices in several months were reached; No. 3 Spring sold at \$1 40@\$1 43; No. 2 do. \$1 48@\$1 54 (tor Chicago and Milwankee), and \$1 61 for No. 1 Spring. Winter wheats remained dull and nearly nomical. The quality of the receipts is hardly up to the standard, causing some arbitration on on the part of buyers for arrival. To-day there was a firmer feeling at the opening, with prime No. 2 Milwankee held at \$1 55, but with ocean freights scarce and high, the market settled down to a moderate business in that grade at \$1 53@\$1 54, and little else done.

Indian corn has been almost panicky. The receipts by canal have been in poor condition, being heated or damp, requiring to be handled immediately. None of the arrivals by canal have been fit to ship to Europe by sail, and but little was in condition to go to Eastern ports by the coasting schooners. Parties wishing to ship corn to Europe by sail have consequently been compelled to resort to the remains of the old crop in store, and pay relatively high prices for it. Yesterday, the business embraced fair new "stesmer" mixed at 48@50, good to prime do. at 52@51c, and old Western mixed at 661c, all affont. The prices for new corn are the lowest in this market since June 1, 1861, which was before tho suspension of specie payments, and leave nothing to the trans-Mississippi growers. Very naturally, therefore, the receipts at the Western markets fast week were less than a million bushels, against more than three million for the corresponding week last year. To-day, prices were higher, fair to steamer mixed selling at 49@53c, and one load of prime do. at 56c, with heated at 46@ 47c; prime new yellow 61c, and prime old mixed held at 68c.

Rye is in better supply and quiet. A considerable portion of the receipts were sold previous to arrival, and are now going forward to Europe. To-day a boat load of Western sold for 94c. Barley remains dull and nominal. Canada peas are unsettled.

Oats have arrived freely by caual, and prices have materially declined, the best new mixed going at 46@ ISc, with prime to choice white at 53@56s. To day prices are again lower, with good to prime mixed selling at 44@45c, and prime white 54c.

The following are closing quotations:

# GROCERIES.

FRIDAY EVENING. June 6, 1873.

The market during the past week has been fairly active on all lines, and at the close the general feeling is fully as steady as at the time of our last report. Coffee has been an exception, the dulness resulting in part from the lack of liberal supplies. The feeling in the tea market is without essential change, and prices remain fairly steady. Raw sugar is unchanged, while refined closes firmer, after a slight decline early in the week. Molasses steady and unchanged. Spices quiet, but firmly held. Fruits selling in a fair way at full rates.

There is a steady demand for lives of teas, but the sales indicate a very cautious feeling on the part of buyers, and lots caunot be pressed at any price. There is no activity in invoices, and the same "hand to mouth", policy seems to be observed by all classes of purchasers. Holders are not making any effort to force their goods upon the market, and no changes can be made in quotations, the same range as last given being repeated. Fhe feeling in Greens and Japans may be said to be fairly steady, notwithstanding the duluess, although it is possible that bolders might be tempted to yield a fraction if a liberal offer were presented. No beavy concessions could be obtained, however, as the stock is controlled by pretty strong hands, and the present prices are as low as importers can afford to accept. On Colongs the market is entirely nominal. Few sales are effected, and buyers and sellers are apart regarding values, with no immediate prospect of their getting together. There have been no arrivals of importance during the past week. Only one auction sale has been made, and that had no effect upon the market, as the offering was very small. The invoice sales since our last have been 1,500 half chests Greens, 7,500 do. Japans, 300 do. Souchougs, 200 do. Oolongs.

Imports at New York the past week have included 55,499 lbs. Black, 570,165 do. Green, and 103,759 do. Japan, per "Elizabeth Graham," from Shanghai. The reccipts indirectly have included 678 pkgs by steamer.

The following table shows the imports of Tea into the United States from January 1 to data, in 1873 and 1872:

Black Oreen. Japan. Total
Atlantic ports, 1873...lbs. 11,23,455 12,806,177 8,444,034 92,774,665 Atlantic ports, 1872..... 11,813,239 12,005,145 8,459,399 31,375,777

The indirect receipts at New York, principally overland receipts from San Francisco, have been 49, 209 pkgs. Aince January 1. against 72, 266 last year. Imports at San Francisco from Jan: 1 to May 16, were 230,100 lbs. of Chins, 1,127,595 lbs. of Japan and 200 lbs. of Java tea.

# COFFEE.

After several weeks of activity the market has again become rather quiet, and the transactions in Rio coffecs since our last 1 report have been very The previous liberal transactions have run stocks down to a pretty low point, and bolders continue to manifest a very firm feeling, their confidence in the stability of the market being in no way shaken by the Rio advices, which continue to be favorable. Some of t'e European markets are less bnoyant, but the recession from the extreme high rates which ruled during the period of great activity is not calculated to seriously disturb affairs here. The lower grades of Rio are still very scarce, and the demand is not easily supplied. There is a lack of West India coffees, and it is difficult to obtain goods suitable for roasting, and arrivals of Maracaibo are anxiously awaited. There are some green Costa Ricas and Laguayras in the market, which are held at full figures. The scarcity of other grades is increasing the which are held at full figures. The scarrety of other grades is increasing the call for Javas and liberal sales of these grades are making. The sales include 10,088 mats Java, ex "J. Rothenburg," just arrived; 300 bags Java, 588 do. Savanilla, 761 do Malabar, 150 do Jamaica, all in lots to consumption; 1,900 do. St. Domingo, shipped to Europe; 608 bags Rio, ex "R. W. Messer," here. At Baltimore 3,000 do., cx "Yamoyden," and 2,166, ex "Chowan;" also at New Orleans, 4,005, ex "Lina."

Imports the past week have included 4.452 bags Rio, per "Preciosa," 4.200 do. do., per "Adelaide Pendergast," 3,404 do. do., per "Union," 3,243 do. do., per "Strossmeyer;" 10,088 nats Java, per "J. Rothenburg," 1,400 bags St. Domingo, per "Eothen," and 696 do. sundries.

The stock of Rio Juna 5, and the imports since Jan. 1, 1873, are as follows:

|                | New     | Phila- | Ralti.  | New    | Mobile. | Gal-    | •        |
|----------------|---------|--------|---------|--------|---------|---------|----------|

# SUGAR.

The market for raw sugars has been fairly steady during the past week, and considerable business has been done, refluers showing more willingness to purchase. The arrivale have been free, but the stock has not increased materially, and the position of the market is now favorable for holders. Cuba refining sugars have sold freely, and the stock has been reduced considerably, while Centrifugale have sold in a moderate way, and the addition to the stock in importers' hands is not very important. Prices are well maintained on all descriptions, and our quotations are nuchanged from last week. The market for refined sigars has finctuated somewhat. At the opening there was less activity, and the tondency of prices was in favor of buyers. This caused refiners to hold off, and as the retail demand has since become more sprifted, that one of the market has hiproved, and prices have recovered from the decline experienced early in the week. The herry season has caused an active demand for powdered sugars, and holders are very firm on this grade, at hetter prices. We note sales of raws as follows: 10,866 hhds. Cuba refining, 7%@8%c.; 65 do. neilasses, 6%c.; 2,358 do. Centrifugal, 8%@9%c.; 514 do. Porto Rico, 7%@9%c.; 20 do. Demerara, 8c.; 50 clarified do., 9%c.; 55 St. Croix, 8%8%c.; 35 do. Texas., 7%c.; 200 Melado, 6%c.; 102 boxes Havana, 6%@8c.; 2,300 do. Centrifugal, 8%@9c.

timports at New York and stock in first hands June 5, were as follows:

#### MOLASSES.

The market has been steadier since our last, with a fair call for refining grades. There have been sales of three cargoes of Cuba refining at 30@30½c., about the same range as was last quoted. The stock of these grades is now reduced down to 4,041 hhds., and holders are firm at full rates. The trade continue to purchase grades suitable for their use in moderate amounts, and we have only 123 hhds. of Porto Rico in stock. There have been more liheral arrivals of English Islands, and the supply has increased to 1,132 hhds. which is held at firm prices. The sales of domestic are made in small lots, but the aggregate is fair, and the stock continues to run down. We now have 1,200 hbls. here, and but very little is coming forward. What has been received of late has been of a very poor quality. The supply is likely to run out much earlier than usual, if the demand continues ordinarily good. Syrupa are quiet and steady at about former rates. The sales of molasses have been 383 hhds., 23 tes. Muscovado, testing over 50°, 80½c.; 322 hhds., 27 tes. do. clayed, testing about 50°, 30c.; 184 do., testing over 52°, 31@33c.; 85 hhds. Porto Rico, 48@65c.; 73 hhds. low do., 30c.; 208 hhds., 15 tes. do., on private terms; 200 bbls. New Orleans within the range.

The receipts at New York, and stock in first hands Junn 5, were as follows:

# THE DRY GOODS TRADE.

FRIDAY, P. M., Jane 6, 1873.

The movement in dry goods during the past week has been light, and no essentially new features have been developed. Jabbers have been making strong exertions in the way of reduced prices to effect a more liberal reduction of their stocks, but this result was difficult to effect, as buyers in the country show no disposition to purchase beyond their actual requirements, which just at this season, are limited to a few of the lighter descriptions of goods. The range of prices this week has been very irregular, especially on cotton goods. With agents the sales are on a very restricted scale and are only in small lots to fill out lines, for which there is a steady jobbing demand. Jobbers will not, of course, purchase very heavily at this late period of the year, the position of the market being unfavorable for any speculative demand.

The easier tone which pervades the money market has been beneficial to the trade in relieving collections, and bills are now met pretty readily by the merchante in the interior, the only exception being in the case of houses in some sections of the South, who are somewhat backward in meeting their bills. Dealers in the West, Northwest, and near by sections are generally prompt in the matter of payments, and the current demand comes mainly from them. So far as we are able to learn, stocks are not very heavy either in first or second hands, and the season will close with our market in a very good condition, slihough prices are more than usually unsettled.

DOMESTIC COTTON GOODS .- The irregularities in prices noted at the close of last week have continued to some extent since, though agents are slow to reduce quotations on any of the more staple lines of goods, and there seems to be a wide discrepancy between the views of agents and jobbers regarding the values of cotton fabrics, and the latter are offering many lines of brown, bleached and colored fabrics at prices considerably below those quoted by the agents. The sales of these goods have not been active, and there seems to be little probability that a revival of activity will be effected even by the most liberal concessions in buyers' favor. The market for print cloths has been quiet and prices are easy at 61c. for extras on the spot, with 68c. offered for future deliveries. The demand for prints is by no means liberaland sales are chiefly restricted to the offerings of job lots, which have been free for some time past. A few prominent brands are still held at full prices, but to make sales readily it is necessary to shade prices. These irregularities are only on light effects. all dark work being firmly held at full values. Other cotton goods are quiet without new feature worthy of note.

DOMESTIC WOOLEN GOODS.—There has been a slight improvement in the trade in woolen fabrics since our last report, and when it is borne in mind that the traffic is entirely of a legitimate character, and that neither light nor heavy weight goods are moving to the slightest extent in a speculative way, the condition of the trade becomes doubly satisfactory. The distribution of the light stocks of Spring weights remaining in first hands has been effected by making moderate concessions in price, and the market is now well cleared. Winter goods have also been more readily sold to clothiers and the feeling among agents is more encouraged. The raw material has not changed and is still procurable at easy figures.

Foreign Goods.—The Summer weather has been favorable for the retail branches and [a more liberal distribution of all light fabrica is reported. The season has so far advanced, however, that retailers are not likely to replenish their stocks with very liberal selections, and the trade in a wholesale way is still devoid of animation. The auction houses continue to offer pretty liberal assortments and have been pretty well attended, although there has been no rush for goods, and prices have been rather low. The imports have fallen off very materially and the supply of goods at the close of the season is not likely to be very excessive. The fact that some of the foreign markets are loaded up with goods which are not unlikely to be consigned to this market is having a depressing effect.

We amnex a few particulars of leading articles of domestic manufacture our prices quoted being those of leading jobbers:

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued on Satur day morning, with the latest news up to midnight of Friday.

# TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE.

# THE RAILWAY MONITOR.

THE RAILWAY MONITOR.

This is a Journal of geocral Railroad Intelligence, intended to supplement the brief railroad news centained in The Cheonicle, and published monthly on or about the fifteenth of each month.

Subscription price per year (including a file cover the first year). \$4 60 in a subscriber of the Chronicle. 3 00

The Chronicle and Monitor will be sent to subscribers until ordered discontinued by letter. Postage is prid by the subscriber at his own must-office, william B. dana, William B. dana, William B. dana, William Street, New York.

To and all William Street, New York.

Subscriptions and Advertisements will be taken in London at the office of the Chronicle, No. 5 Austin Friars, Old Broad street, at the following rates:

Annual Subscription to the Chronicle (including postage). £2 2s.

Monitor 10 18s.

Advertisements, in either Journal, is, per line each insertion; if ordered for five or more insertions, a liberal discount is allowed.

The Publishers cannot be responsible for Remittances unless made by Drafts or Post-Office Muney Orders.

The Anest file for holding entrent unmbers of the Chronicle is seld at the office for 50 cents, postage on the same is 20 cents. Volumes bound for subscribers at \$150. The first and second volumes of the Chronicle are wanted by the publishers.

# THE PROMISING ASPECTS OF BUSINESS.

If we except the flurry in the cotton market, the tranquil. lity of the monetary situation has not been disturbed by any untoward events this week; and the cotton trouble, which is analysed elsewhere, has too limited an area to attract much notice except as adding another to the numerous illustra tions of the case with which such shocks are recovered from, and of the extent to which speculation has intruded into almost all departments of commerce and trade.

Among the indications of monetary improvement we observe that the banks are gradually increasing their reserves which now smount to \$10,815,325 in excess of the legal minimum of 25 per cent. The specie line is now 26 millions, and if 10 millions of this sum belongs as is said to the speculators, and is merely suffered to be in bank as a special deposit, still the reserves, deducting these special deposits will be fully up to the legal requirement. The Comptroller

of the Currency will probably, in the interest of safe banking, require hereafter from the banks that the specie owned by their dealers, and held by them on special deposit, shall be reported separately from the specie held and owned by the banks themselves. This arrangement will probably precede the prohibition of the banks from counting as reserve specie which is mere collateral and which they do not own, and it is uncertain what precise arrangement will be deciled on with a view to prevent banking as at present on borrowed reserves of gold.

As to the anticipated export of specie, the change in the discount rate of the Bank of Ergland seems to have checked the anxiety on the subject, and on the contrary a belief has sprung up that there would even be an import of gold here on account of the payment of the Alabama Indemnity. There is, however, no real reason for expecting such an import, and it is singular how in the present state of affairs such a belief could have got into notice. It is true that the amount, which is \$15,500,000, is due in gold at Wash. ington next September; but it is computed that our foreign trade creates 2 millions of bills every day on the average, or 600 millions a year, so that this Alabama indemnity of 15 millions only represents the average purchases which our foreign commerce repeats every eight days, and has to pay for in gold or its equivalent, to foreign countries, for the mest part through E gland.

Besides this general commerce, with its creation of foreign bills, our Government has just called 20 millions of bonds, of which 16 millions are held abroad. This call will mature September 6, so that the British Government will have two easy methods of paying the money at Washington. First, they can remit thither foreign bills which are the equivalent of gold; or secondly, they can make the 16 millions of called bonds available. For this latter purpose the needful arrangement can, we presume, be easily made with our Treasury, and with the Syndicate. Indeed, a proposition is said to have been already offered by the Syndicate for this purpose to both Governments. Our own Treasury and State Departments will certainly concede all the facilities which may be found necessary in the present febrile condition of the London money market, to meet the sensitiveness of the Bank of England as to its gold reserves.

The general state of business is inert and the torpidity is ascribed to several causes. First, our banks, it is said, are for the most part refusing accommodation running longer than October and in many cases business men bave a wholesome dread of stringency in that and the following months, so that a check is given-to enterprise. Another impediment to business arises from the heavy losses of our industrial community during the past nine months, as the charges

they have had for interest of capital have taken the unprecedented range from 7 to 20 per cent. for mercantile loans. It is certain that the resources of great numbers of persons of limited means have thus been impaired, and that a policy of caution has been enforced upon them. Another circumstance which is often mentioned as a hindrance to business is the want of elasticity in the volume of the currency. So large an amount of greenbacks and bank notes have been absorbed in the South and in the interior where they remain and do not return to the North as they used to do that the impediments to business from this cause are growing every year. The cause of this inclasticity which makes the currency so scarce in the fall and winter is well known. It arises first from defects in our system controlling national bank notes, which are not practically subject to redemption in New York; and secondly, from the fact that these notes enjoy a forced circulation, because they are a qualified legal tender, and because they bear the indorsement of the Government, which assumes all the responsibility of paying the notes if the issuing banks should fail.

The effect of this mischievous currency inelasticity is two fold. First, it makes the notes accumulate in dull seasons in the hands of the public instead of lying idle as they should in the vaults of the issuing banks. Thus the notes get dispersed during the dull period, and inflate prices as all forced currency does when it is redundant. Secondly, when the busy season comes round, and currency is wanted, it remains dispersed. It is not to be had, because it has been scattered by a bad system of distribution. Thus the inelasticity of the currency has become one of the chronic evils which discourage the activity of business, and it seems to admit but of two palliatives in the absence of new legis lation by Congress. One is that the banks of our chief cities shall accumulate large reserves of greenbacks in prep aration for the fall requirements of business; and the other is that the Secretary of the Treasury, as the exigencies of the public service may enable him, shall also add to his currency balance and accumulate it for the copious dishursements which will be needful in autumn. If judicious precautions be taken, the prospects for business seem in several important particulars to offer promising results notwithstanding the backward spring, the monetary stringency, the foreign complications and the multiplied drawbacks of the past half-year.

# THE GOLD MARKET AS AFFECTED BY THE BANK OF ENGLAND.

The sudden weakness in the gold market of late is in good part due to the inability of the Bank of England to keep up its rate of 7 per cent. Last week we showed that this advance, if followed up long enough, would cause a gold shipment from us, and that the only hope of sustaining the advance lay in a general rise of the rates in the money market at London to a level with the bank rate. As we hinted, the open market has not responded. For some reasons it has obstinately persisted in keeping down  $\frac{1}{2}$  to  $\frac{5}{4}$  per cent below the bank minimum for call loans, and  $\frac{1}{4}$  to  $\frac{1}{2}$  per cent for three months' biffs. This obstinacy was fatal to the project of keeping up the bank rate, which was reduced to 6 per cent on Thursday.

It would be instructive if we could learn what are the practical measures to which the managers of the Bank of England have had recourse to increase their bullion this week. By some persons the influx of gold will as usual be ascribed to the advance in the rate, which is supposed to possess some mystic occult virtue in such cases. But this theory is hardly borne out by the

facts. Even the most unreflective reasoner on the subject will see that the advance has not been started long enough to begin to operate. Moreover if the bank directors had not some other expedient for getting gold, if they were dependent on the advance of the rate of interest for their sole means of replenishing their bullion reserve, they would never have ventured, when that reserve was down to 20 millions, and while the public mind was sensitive as to this small reserve of gold, to revoke the advanced rate almost as soon as it was made. They would at any cost have kept up the needful precaution of the seven per cent. rate a few weeks longer it they had relied upon it as their only expedient for replenishing the gold reserves. Moreover the telegraph yesterday informed us that the Bank of England has increased its bullion reserve by £421,000 sterling, or \$2,105,000, while the Bank of France is reported to have decreased its bullion reserve by 54 million francs, or \$10,800,000. By this unprecedented export of gold from Paris the Bank of England has obviously profited, and it was as a consequence of this improvement that the rate of the latter institution fell back to six per cent.

With this evidence before us two points seem sufficiently established. First, that the bullion reserve of the Bank of England has been replenished this week by a considerable sum, so that the feverish anxiety on account of its depletion is passing away, and confidence is returning. Secondly, that the condition of the London money market is such that it cannot sustain the rate of 7 per cent, because its supply of loanable capital is in excess of the demand, and con sequently by a well-known law the rates of interest tend to a lower instead of to a higher rate. These two points are almost the only ones in which we are practically concerned. There are current rumors that the Bank of France has voluntarily accommodated the Bank of England with a part of its gold reserve, as it is said to have offered to do some time ago, and that the gold export just made from Paris is connected with the payment on Tuesday last of the \$50,000,000 which forms the June instalment of the indemnity to Germany. But these and other unauthenticated. reports, however curious and important in other respects, have for us e subordinate practical value; and besides we must wait for further information by mail before we can learn much more about them. But recent drain of gold from the Bank of England and its apprehended continuance arose out of movements connected with the heavy payments, past and prospective, of France to Germany, there is an evident propriety and justice in such a special offer of bullion as has been suggested from Paris to London. And we may perhaps find, when the facts are fully disclosed, that there is some truth in the reports current here for some days past on this subject. If so, this aspect of the question may be worth discussing in connection with the next three indemnity payments, which will be \$50,000,000 each on the 5th of July, August and September, and their possible effect in depreciating the French currency. As to these payments the Economist gives the following information:

The report that the next instalment of the last milliard of the indemnity would be settled mainly by a direct transfer of bullion from the Bank of France to the German Government, has since been contradicted. It may be interesting, therefore, to remind our readers of the exact progress which is being made with these enormous payments which affect the money markets of Europe so much, as the German Government encashes from time to time the bills which it receives. The last convention, relating to the order of payment of the indemnity, was made on the 15th of March, last. Up to that time the German Government had received 3½ milliards (£140,000,000) out of the 5 milliards (£200,000,000) stipulated by the Treaty of Peace. No doubt the value of the Alsace and Lorraine Railways (£13,000,000) was reckoned as part of the £140,000,000, se that the transfer of money may be thought to have been so nuch less; but, in reality, the German Government had received rather more than £140,000,000

In money or bills, the deduction of £13,000,000 for the Alsace and Lorraine railways being more than compensated by the interest payments, not to speak of the Paris war contribution. The sum of £140,000,000 having thus passed from France to Germany before the 15th of March last, the treaty of that date stipulated that £20,000,000—the second moiety of the fourth milliard—was to be paid before the 10th of May, and this has in fact been done. Germany by the 10th of May, had received £160,000,000. The treaty also stipulated that the £40,000,000 constituting the fifth and last milliard was to be paid by equal lastalments of £10,000,000 each on the 5th June, 5th July, 5th August, and 5th September, on which last date France is also to pay the interest due from 2d March, 1873. In other words, France has now something over £40,000,000 to pay within a period of little more than three months, just after having made a period of little more than three months, just after having made a rather heavy payment of £20,000,000. According to a statement just made by the Minister Delbruck to the Reichstag, Germany will have received altogether, by the 5th of September, about £222,000,000, viz.:

Indemnity (5 milliards). £200,000,000 Interest
Paris contribution, &c....

£222.275.000 Deducting the value of the Alesce and Lorraine railways reck-ned in the £200,000,000, the transfer altogether will be £210, 000,000 in bills and cash within barely two years and a half, and about £125,000,000 of this amount will have been transferred within the twelve months ending next September.

Meanwhile the retrograde movement of the bank rate forms an important element in the discussions of our own financial movements in the early future. We have for many reasons a special interest in this change. It would be enough, however, if there were no other reason than because we hold large amounts of capital from abroad floating in our money market. To lose any considerable part of these loanable funds, or to have them suddenly drained away, would wreck many promising financial enterprises, and would leave many others stranded and in danger. We need all the foreign capital we can attract hither, and we need to keep all we have. It is true that just now our money market is not so sensitive to mischief from its withdrawal as during the recent stringency. Still the fall money market will soon be oppressing us with its immense demands, and our chances of weathering the financial storms which threaten us will be improved in proportion as we can keep up at its height the steady tide from abroad of this foreign capital. How this tide might be checked by a high and fluctuating Bank of England rate, and how it would be developed and swelled by a steady or declining rate is well known.

# THE DEMAND FOR MORE BANK ISSUES.

If, as the elementary teachings of economic science assure us the three chief instruments, which combine for the growth of national wealth, are industry, capital, and currency-then, by the two first of these grand productive forces, wealth is created; and by the third it is distributed and put in circulation. Comparing the body politic to the natural body, it has been said that if the forces of industry are analogous to these vital powers with which nature has endowed all living organisms, capital is the material sub stance of each structure, and currency is the circulating fluid which conveys and distributes vital force and activity of function in every organ. It is in view of these suggestive analogies that political economy was with reason called by J. B. Say "the physiology of our industrial life."

We refer to this view of M. Say because it has been misused as an argument for a mischievous project which is again being a good deal agitated, and is forcing its way continually to the surface of our politics. The scheme to which we refer is that of the issue of more paper money. It aims at neither more nor less than the revival of the financial fallacies of John Law, which plunged France into its first National bankruptcy in the eightcenth century, and started a profound disruption in the organic structure of society which has had more influence than is commonly supposed in producing that fatal instability in French politics which has been so conspicuous from that time to the present! pass current at par with coin.

day. Law's theory was that currency—the life-blood of the industrial organism of society—ean be increased almost indefinitely, and that such plethoric increase of currency is an increase of solid capital, even if the new currency created be of paper money, and consist wholly of bank-notes or government promises to pay. The followers of John Law among us are in favor, some of them, of an increase of bank notes and others of an increase of greenbacks. But all alike are anxious for a plethoric outpouring of more paper currency to add to the vital energies of capital and industrial enterprise. One of their advocates very fairly set forth the views of the former class a few days ago as follows:

The necessity for more money is being strongly urged by some of the financiers of the West, not with a view to elicitan additional issue of legal tenders, but to induce the estab ishment of more National Banks. It is only a popular fallacy that there exists at the present moment anything like inflation. The reverse is the fact. Considering the growth of our national body, it may even be contended that there is now scarcely enough of currency blood in its veins to maintain the enlarged vitality to which this growth in its veins to maintain the enlarged vitality to which this growth has given rise. In 1870 our paper circulation was but little over 14 per cent increase over that of 1860, while the increase of population was about 22 per cent. Of capital engaged in manufactures the increase in ten years was upwards of 100 per cent of capital; in coal mining the increase was 300 per cent; of capital engaged in iron mining the increase was 175 per cent; of miles of railroad in operation there was an increase of 75 per cent; and so on, the so-called "inflation" of money standing at the utterly disproportionate figure above named, say 14% per cent. The multiplication of interests, the development of industrial enterprises, the settle ment of new territory, the outreaching of iron fingers into the ment of new territory, the outreaching of iron fingers into the heart of a country hitherto wild, and the peopling of new towns and cities that have sprung magically into being—all these incidents point to the fact that the field for the use of money is any thing but too contracted for the amount now in circulation, or that prices are artificially enhanced. The truth is, we are every day getting nearer to "hardpan," at the same time that faith in the National credit is giving that elasticity to currency which is the life of commerce. the life of commerce.

These inflationists offer vigorous opposition to issues of greenbacks. The other class object to issues of bank notes, and prefer greenbacks because the profits of their issue would go to the Government, so that the nation, and not the banks, would get what of gain there is to be made by the emission. These greenback-expansionists, as is well known, pressed into their service for a brief season Mr. Richardson, who has very properly adopted since his appointment as Secretary of the Treasury, the anti-expanaion policy which has been uniformly held by every one of his predecessors from the beginning of the existence of the United States as an independent nation.

The fallacy is evident of attempting to use J. B. Say's argument to support any of these schemes of inflation, Granted that the industrial organization of a nation offers many analogies to the material organism of the body, and that the currency of the former is like the life-blood of the latter, what does this prove but that the currency like the blood must be kept good and sound and healthy, that the current of circulating money must not be gorged or plethoric. and that the strength and growth of our industrial life depends on an equilibrium between the supply of currency and the effective normal demand of the industrial system for its use? If all these points be conceded, as they must be, then this latest argument of the inflationists will not greatly help their cause, except they can prove that the present state of our industry offers an effective normal demand for more currency than is at present outstanding. And how can they prove this so long as the paper dollar is at a discount as compared with the dollar of gold? If they could establish this absurdity they would still require to prove that our paper money possesses other requisites of a wholesome cur-This proof would be impossible so long as both heak notes and greenbacks are alike irredeemable in gold, the only sound real money which can subserve the permanent purposes of circulation. Whichever way we view the argument, therefore, it appears that no new issues of currency can without grave mischiet be issued till the notes at present outstanding are redeemable in specie, and till greenbacks

# THE GROWING COTTON CROP.

ACREAGE AND CONDITION.

After a very lengthened and careful correspondence, we are able to day to furnish our readers with our annual report of cotton acreage for the coming season and the condition of the growing crop up to about the 7th of June. We pursue our usual course and give below first the detailed results of all our letters received with regard to each State, and secondly a summary of the conclusions drawn from these details.

Texas.—The crop in Texas was (up to say the 15th of May) from three to four weeks late in the middle and southern portions. Planting was not finished this year until about the 1st of May, against the 1st of April in 1872. This late start was due to the cold weather and frosts, which made it necessary to replant about one-half of the sections men tioned. In the northern counties the conditions have been more favorable, although the early progress was even there slower than a year ago, leaving the cotton (May 15th) on the average about a week or ten days later than in the same districts last spring. Since about the 5th to the 10th of May the weather has been all that could be desired, and consequently the improvement has been rapid, and from that time very few complaints have been received from any section. As to the labor, there has been a considerable increase -little in the southern half of the State, but much more in the northern half, where the increased acreage is mainly reported. There is also said to be less railroad building in the State than a year ago, and the hands set free from that work make a further addition for plantation purposes. The average increased acreage throughout the State is 14 per cent over last year.

Louisiana .- For the planting season the weather in Louisiana was very similar to the weather in Texas during the same period. A good early start would have been obtained, but the cold and frosts put back the work, and finally made replanting necessary in at least one-quarter of the State. Since the first week in May there has been a decided improvement, and in the northern half of the State up to the last of May everything was progressing favorably except during the last week when the rain had become excessive and complaints of grass were beginning to come in from some sections; but, on the whole, we should judge that the portion of the State referred to was doing full as well as a year ago, only perhaps a few days, possibly a week later. The southern half of the State, however, has not progressed as rapidly, and is still backward, besides having much more rain, so that in some sections the plant is quite choked up with grass. Dry weather is greatly needed, and if it is obtained soon no damage will be done except in very limited districts. The plant is, as a general thing, strong and well rooted, and generally was well cleaned before the late rains set in. There is a considerable increase in labor in some portions of the State. The increased cotion acreage is about 12 per cent over last year.

Mississippi and Alabama.—In these States the weather for the preparation of the land for planting was favorable—more so than last year, and was put in better condition. April was dry and cold, so that much of the seed planted did not germinate, and frost damaged some that was up. Replanting did not, however, become necessary except to a limited extent, the most of the seed being in by the 20th of April, a few small plantings being extended into May 10th. About the first of May there was a favorable change in temperature, and the improvement of the plant was very rapid, showing a strong, healthy growth. Rains, however, were frequent, and the fight with the grass the last half of the month, especially in the lower half of these States, has been

a severe one. In the northern portions there has been much less rain, and consequently the condition at present is good. With a return of dry weather now we should consider that the prospect in both Alabama and Mississippi was very promising. There has been no increase of labor in Alabama, but in portions of Mississippi there has been considerable additions to the supply. The acreage increase may be put down at 11 per cent for Mississippi, and 12 per cent for Alabama.

Georgia .- The spring was backward, but the weather was favorable for planting purposes, so that all the seed was in at least as early as last year. Cold weather, however, retarded its growth, the plant coming forward slowly, until well into May, when with higher temperature more rapid progress was made. By the last of May the condition of the crop was good, nearly all being chopped out, the plan: continuing still rather small, but strong and healty. Beginning with and since the latter part of May, a part of the State has been visited with excessive rains and is now greatly troubled with grass; but as you go inland the rains have been less frequent, and the temperature, in some cases, high, resulting for those districts in a very promising development of the plant. The labor supply is stated by all our correspondents to be about the same as last year, although there has been a movement from Georgia of negroes to the Southwest, the deficiency being made up by white labor, and one correspondent states by an increase of women in the fields. The increase in the use of fertilizers is large, as much as three-fold in a considerable portion of the State, and the increase in acreage averages 7 per cent.

South and North Carolina.—With regard to these States we have received much the same reports given above for Georgia. Towards the last of May the average condition was better than a year ago. The first two weeks of June were, however, wet, and yet this remark refers more especially to the half of the State nearest the coast, though in some cases its application is more general. Fertilizers have been used to a much larger extent than a year ago. Labor is stated to be on the average about the same in quality and quantity. The increase of acreage is South Carolina is 4 per cent, and in North Carolina 10 per cent.

Tennessee and Arkansas.-Taking the whole of these States together we should pronounce the present condition of the cotton plant as good. The aeason has certainly been colder than last year, but a fair stand was obtained, though it averaged about two weeks later, and early became involved in grass. The last three weeks there has been a gradual improvement in the prospect; this, perhaps, is more marked in the middle and eastern portions of Tennessee; but the whole of the two States show improvement, as the rain has become less frequent, and the laborers are working well and making good headway against the grass. There has been quite a large increase of labor in the cotton fields of western Tennessee and Arkansas, consisting of negroes from Georgia, Middle Tennessee and Virginia, and of whites mostly from East Tennessee, and North Carolina. In acreage Tennessee shows about 11 per cent increase and Arkansas 13 per cent.

Conclusions.—We think our readers need very little in addition to the above for a proper understanding of the points involved in our inquiry, and yet the following conclusions, being the necessary deductions, may serve to present the facts in a little clearer light. We would state, however, for the benefit of a few who are always hasty in reaching results, that it is not by any means certain that a crop commensurate with the planting prospects is to be har, vested. What we give is simply the outlook, as it appeared to our correspondents from about the 1st to the 7th of June-

First—The crop had a late start and a very slow development up to say from the 1st to the middle of May. At that time the plants were very small, and two weeks or more backward, but were as a general thing once chopped out. Then with warmer weather they grew rapidly. Toward the latter part of May wet, sultry weather began to visit a considerable portion of the South, and has since continued in the coast-half or two-thirds of the Gulf and Atlantic States, making grass troublesome. In the West the grain and grass came more in May, so that the plantations there did not generally get the early clearing; but now, with the weather less unsettled, the fields are gradually becoming better worked, and the young plant is giving decided evidence of an improved condition.

Sccond.—In the Western and Southwestern States there has been a considerable increase in the supply of labor; in the Atlantic States there has been a much freer use of fertilizers, and in the average no decrease in labor. With regard to the labor we anticipated finding some falling off in the supply in the Atlantic States, knowing that from that section there had been a movement toward the richer lands of the Southwest. We have no suggestion to make in explanation of the fact reported that there has been no such failing officecept the statement of a correspondent, that to some extent women have supplied the place of the men who have gone, while in other sections there is more white labor on the plantations, and in still others a decrease in Frailroad building has helped to make good the deficiency.

Third.—As to the acreage in cotton we have prepared the following table which shows the figures this year, and the three previous years according to our own reports:

|                | 1873      |           | 1872.     | 1871.     | 1870.     |
|----------------|-----------|-----------|-----------|-----------|-----------|
| States.        | Increase. | Acres.    | A res.    | Acres.    | Acres.    |
| Texas          | 14 p. e.  | 1,027,068 | 900,937   | 802,731   | 900,937   |
| Louisiana      | 12 p. c.  | 1,030,700 | 920,700   | 828,630   | 920,700   |
| Mississlppl    | 11 p. c.  | 1,825,408 | 1,641,512 | 1,447,191 | 1,614,512 |
| Alabama        | 12 p. e.  | 1,529,258 | 1,365,409 | 1,221,682 | 1,437,272 |
| Florida        | 8 р. с.   | 152,188   | 140,909   | 126,819   | 140,909   |
| Georgia        | 7 p. c.   | 1,382,015 | 1,291,063 | 1,157,963 | 1,330,991 |
| South Carolina | 4 р. с.   | 625,740   | 601,674   | 481,412   | 601,704   |
| North Carolina | 10 p. c.  | 496,885   | 451,714   | 397,509   | 451,714   |
| Tennessec      | 11 р. с.  | 613,267   | 552,493   | 489,352   | 526,184   |
| Arkansas       | 13 p. c.  | 888,329   | 779,318   | 654,796   | 711,734   |
| All others     | 6 р. с.   | 231,957   | 218,828   | 203,611   | 218,828   |
|                |           |           |           |           |           |
| Total          | 11 p. c.  | 9,802,815 | 8,867,557 | 7,811,696 | 8,885,545 |

Here we have an increase of 935,168 acres over last year, and of 917,270 acres over the planting of 1870, being an average increase for 1873 of 11 per cent over 1872.

# RAILROAD EARNINGS IN MAY, AND FROM JAN. 1 TO JUNE 1.

The earnings of those railroads which continue to favor the public with a statement of their traffic, again present a favorable exhibit for the month just passed. The monetary stringency at New York and other financial centres, which continued with little cessation from September, 1872, to the early part of May last, bore quite heavily upon railroad borrowers, particularly the new companies which were negotiating honds, and with this influence tending to depress railroad property, it is fortunate that the actual business on the roads has been well sustained, and that the earnings, which must form the real basis of railroad prosperity, are generally on the increase.

# RAILROAD EARNINGS IN MAY.

* Three weeks only of May in each year.

The figures in the accompanying tables are well understood to represent gress earnings, and in only a very few cases do companies also report their current expenses and the resulting net receipts. The Central of New Jersey has made a report of its earnings and expenses for four months from January 1 to the end of April, as follows:

|               | 1873.          | 1872.           | Increase.    |
|---------------|----------------|-----------------|--------------|
| Receipts      | \$2,527,952 84 | \$2,134,768 03  | \$399,184 91 |
| Expenses      | 1,365,291-53   | 1,354,463 96    | 10,430 56    |
| Vett cornings | 44 160 654 93  |                 |              |
|               |                | # 77 D OOL 1 OT | # 240 751 DE |

The Union Pacific also reports its traffic in similar shape for the month of April and the same four months, as follows:

| April, 1973.<br>Earnings\$881,266-38<br>Expenses (incl. \$91,000 for          | April, 1872.<br>\$741,802-56            | April 80, 1873.<br>\$2,605,281-32 | April 80, 1872.<br>\$2,115,715 17       |
|-------------------------------------------------------------------------------|-----------------------------------------|-----------------------------------|-----------------------------------------|
| renewal of rails) 474,078 81                                                  | 885,997 71                              | 1,445,474 56                      | 1,524,762 22                            |

# [From our own correspondent.]

# London, Saturday, May 31, 1873.

Although the Bank return shows that the amount of "other securities" has fallen off to the extent of £901,299, the demand for money has nevertheless been active, but the principal discount business transacted has been in the open market, where the ates varied during the week from 51 to 52 per cent. The Bank is therefore underbid, and is doing less business than for some time past. The effect of higher rates of discount as well as interest for deposits has been to attract a large supply of money from the provinces for investment here, and hence the return of notes and coin has been very considerable since the advance to 6 per cent was made. Five per cent for money left at call is a very satisfactory rate of interest to obtain, and many persous throughout the country are taking advantage of it. The effect has been therefore to improve the position of the Bank, the proportion of reserve to liabilities being now somewhat under 35 per cent. Dearer money has been, however, without apparent influence on the foreign exchanges, and it is contended that as they have not turned in our favor with six per cent as the official minimum rate of discount, either the Bank will not reduce their quotations, or, if they do, they will soon be compelled to return to the same point. The New York Exchange is quoted at 1081, at which quotation no gold can of course be expected, and as we have lately been large buyers of foreign stocks, the German exchanges are not likely to turn in our favor. We may possibly receive gold from France, as that country, since the change of government, has purchased a large amount of French stocks in the London market, the result of which has been to force up the price of French scrip to 63 premium. From other quarters very little gold is now arriving. A fair quantity of sovereigns have lately been returned from South America and from Egypt; but the importations from Australia have been upon a very moderate scale. It is evident, therefore, that as it is the gold movement which is causing money to be comparatively dear, and as the supply of geld held by the Bank is far from being excessive, the present official minimum will be maintained. Many think it is possible that the home demand for discount will be so trifling, comparatively speaking, while the Bank may also lose so much business by the outside rates being lower than their own, that the directors may venture upon a reduction; but the effect would be that the money which six per cent, or more correctly, the five per cent rate of interest for deposits, has attracted to the metropolis would be quickly withdrawn; so that the probability is that if a reduction were to take place, the airectors would soon have to revert to the six per cent rate. A member of a large house having extensive dealings with Germany, in reply to the question if the bank rate was likely to be reduced, said to me this week that the rate would be 7 before it was 5. His reason for saying so is undoubtedly a good one. It was this, that as the panic in Germany is not yet over, and that further large sales of marketable foreign stocks will continue to be made by Berlin, Vienna and Frankfort houses, a large proportion of our unemployed money will be invested in the foreign stocks-United States, Turkish, Egyptian, Italian, Spanish, Erie Railway shares, Lombardo - Venetian shares, &c-which the pressure of the times compels Germany to part with. Even the best houses have paid in Berlin this week as the "liquidation" ten per cent for "continuations;" and if that is the case it will certainly not prove remunerative to hold stocks, the interest upon which is so much less. But, on the other hand, I may observe that France has purchased her own stocks in this market on a very large scale; so that, while we have been taking in stocks from Germany, come millions sterling of French stocks have been removed from this market. We are possibly, therefore, much in the same position that we were before, except that the securities we hold yield, on the whole, a higher rate of interest.

The demand for money in the open market has been good, but at the bank much quietness has been apparent. The following are the quotations:

|   | Per cent. 1                 | Per cent.                         |
|---|-----------------------------|-----------------------------------|
|   | Bank rate 6                 | 4 months' bank bills 51/05%       |
|   | Open-market rates:          | 6 months' bank bills 5 @5%        |
|   | 30 and 60 days' bills 5%@5% | 4 and 6 months' trade bills. 5 @6 |
| ĺ | 3 months' bills534@5%       |                                   |

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

| Į | rereent                              |    |
|---|--------------------------------------|----|
| l | Joint stock banks                    |    |
| Ì | Discount houses at call 5            |    |
| I | Discount houses with 7 days' notice  | 1  |
|   | Discount houses with 14 days' notice |    |
| ļ | Discount notice with 11 days notice  | 30 |

The following are the rates of discount at the leading Continental cities:

| Dau                    | к Орен      |                     | DATE    |          |

Gold continues in demand for export to Germany, and all incoming supplies are absorbed. In the silver market there is no important feature, but there has been a large arrival of Mexican dollars via the West Indies and New York. The following prices of bullion are from the circular of Messrs. Pixley, Abell, Langley & Blake:

| GOLD.                                      | s. d. s. d. |
|--------------------------------------------|-------------|
| Bar Gold per oz. standard, last price.     | 77 10 @     |

| South American Donbloons pcr oz.           | 73 9 @ 74 0 |
| United States Gold Coin per ez. none here. | @           |

SILVER.

In the foreign exchanges the chief movement has been a demand for bills on Italy and Vienna, owing to the large purchases which have been lately made of Italian and Austrian stocks. There has also been a good inquiry for bills on Paris, which has occasioned some surprise, as France must owe a considerable sum here in consequence of the large purchases of stock made on French account.

The change of government in France has caused a strong demand to prevail for French scrip, and business has been done as high as  $\frac{e}{2}$  premium. Germany and Austria, however, have sold largely in this market the bonds which are chiefly dealt in in that market; but as we have sold our French stocks, our purchasing power has been great, so that no depression has prevailed. In fact, towards the close of the week a firm tone was apparent, and United States government bonds and Eric shares improved in value. United States securities are in nearly all cases firm, although Illinois Central shares are dull. Consols are

firmer, and are now quoted as high as  $94\frac{1}{8}@94\frac{1}{4}$  for the July account. The following were the closing prices of consols and the principal United States securities this afternoon:

| Consols                                                             | 93%(6 93%    |

The corn trade has been quiet not only here but in Europe generally, and there has been no change of importance in prices. The supplies offering are light, but there is a good supply of foreign wheat affoat, and this fact induces millers to operate with caution, and to only supply actual wants. The weather during the week has been bright, but with a cold northerly wind. Vegetation, therefore, has made but little progress, and there is consequently every indication that the harvest will be late. This is a matter of great importance, as we, and also Europe, needed an early harvest. Should, as is expected, the European harvests be late, the growers of wheat in the United States will have a fine opportunity of marketing their surplus on profitable terms.

The following figures show the imports and experts of cereal produce into and from the United Kingdom since harvest, viz.: from September 1 to the close of last week, compared with the corresponding periods in the three previous years:

The public sales of colonial wool were brought to a close this evening, and during their progress 205,552 hales were disposed of. Messrs. Hoare and Hudson in their circular, just issued, remark:

On the opening night there was a good attendance from all parts, but amongst foreign buyers it was noticed that by far the largest number was from France. Nearly all purchased with spirit, and very little change was apparent in prices, except that greasy Adelaide wool, being in special request on foreign account, was considered to be rather dearer.

The healthy feature in this series is clearly in Australian wool.

was considered to be rather dearer.

The healthy feature in this series is clearly in Australian wool. There have, indeed, been certain descriptions which have not commanded a ready sale; for instance, half-bred wools, which were in large supply, were purchased with extreme caution throughout, the quantity offering being not enly considerable, but the trade of Bradford has also been in an unsatisfactory condition, a circumstance which has tended in inducing buyers to restrict their purchases, unless they were able to effect them on more than usually favorable terms. Importers have had, therefore, to submit to a reduction in prices, as compared with last series, of 2d. per 1b. Medium and fine descriptions of washed Australian wools have, however, been freely competed for, and

the rates obtained fully equal to those current at the previous series; but greasy wool, for which there has been a special demand—principally on French account—commanded an improve of ld, to 1½d, per lb.

of ld, to ld, per lb.

Cape wools, though less depressed towards the close, have to a large extent been adversely affected by the large supply of South American wool brought forward at the Antwerp sales. The Germans have not been large buyers here, and the holders or importers of Cape wool experienced, therefore, some difficulty in finding a ready market for their produce. The decline which teok place in prices, however, attracted the attention of buyers, and led to a partial recovery before the sales closed.

The sales held during the present week passed off in a manner which indicates that there is much inherent firmness in this branch of our trade. The attendance of buyers increased, while French houses, by continuing to make large purchases, gave con-

The sales held during the present week passed off in a manner which indicates that there is much inherent firmness in this branch of our trade. The attendance of bayers increased, while French houses, by continuing to make large purchases, gave considerable support to prices. The French, in fact, netwithstanding their numerous difficulties, political, financial, and commercial, rendered important services at this series, and have done much to give a decided as well as a healthy tone to the market.

The dearness of coal is now less talked about, as by this time the opportunity has been afforded to manufacturers of fixing the

The dearness of coal is now less talked about, as by this time the opportunity has been afforded to manufacturera of fixing the price of cloth at a figure which the value of the raw material and the expenses of manufacture will justify. Cape wools may possibly be affected to some extent by the panic in Germany, but as that panic is on the Bourse and not in trade, any apprehension of seriously adverse results is no doubt unfounded.

It is estimated that the quantity taken for export is about 95,000 bales.

The next series of sales is fixed for the 10th of July, and it is estimated that about 200,000 bales will be offered. The arrivals to date consist of the following:

| Sydney and Queensland | 23,149  | bales. |
|-----------------------|---------|--------|
| Victoria              | 33,499  | **     |
| Adelaide              | 5,689   | 64     |
| Swan River            | 2,717   | 46     |
| Tasmania              | 3,732   | 4.4    |
| New Zealand.          | 21,140  | 4.0    |
| Cape                  | 14,065  | **     |
| Total                 | 103,974 | bales  |

#### English Market Reports-Per Cable.

The daily closing quotations in the markets of London and Liverpoel for the past week have been reported by submarine telegraph as shown in the following summary:

London Money and Stock Market.—American securities close at advanced prices.

The bullion in the Bank of Eugland has increased £421,000 during the past week.

The rate of discount of the Bank of England has been reduced 1 per cent and is now 6 per cent.

Amount for which provision is to be made, in payments of about \$200,000 monthly.........\$1,911,118 87

In making the statement of property the report says the Company own a large amount of valuable real estate, wharf property, &c., at San Frencisco, San Diego, Oregon, Acapulco, Panama, Aspinwall, Hong Kong, Shanghai, Yokohama, Hiogo, Nagaski, &c., estimated by the report recently made at \$2,009,531 77, and also gives a list of thirty-four steamers belonging to the Company including those recently purchased from the late Anstralian Steamship Line, but it says, "The Company deem it unwise to append any valuation to these vessels, it being their purpose to have them properly appraised at as early a date as practicable." The report concludes as follows:

STATEMENT OF RECEIPTS, EXPENSES AND BEPAIRS, FOR THE YEAR ENDING MAY 1, 1873.

 Gross receipts.
 \$5,785,210 63

 Total expenses, including all repairs, &c.
 4,958,521 61

\$826.689 02
Steamers lost during the year: America, \$1,017.942 22; Sacramento, \$600,000;
Guatemala, \$60,000, less insurance \$20,000—\$40,000; \$10.000,0f this insurance is in suit. Valued as per estimates last published, \$1,637,912 22.

An examination of these figures will show great discrepancies, and for large amounts, when compared with the statement presented to the Board of Directors at the last annual meeting a few weeks ago. few weeks ago.

Ware River.—This road was sold at Ware, Mass., recently under trustees' sale. Mr. C. W. Chapin, President of the Boston & Albany Company, purchased the road for \$350,000. The road extends from Palmer, Mass., northeast sixteen iniles to Gilbert-ville and some little work has been done on an extension to Win-chendon, thirty-three miles further. It was, until recently ope-rated by the New London Northern Company, but lately passed under the control of parties in the interest of the Boston &

-At the rate the gold bonds of the Vermont division of the Portland & Ogdensburg Railroad are selling, they afford a much Portland & Ogdensburg Railroad are selling, they afford a much higher Interest than government bonds, and they are secured by a first mortgage at the rate of only \$20,000 per mile. It is stated that the road is being built very economically; half of it is already in operation, and the rest approaching completion. These bonds are a New England security, and the fact that the leading manufacturing house of Fairbanks & Co. are the selling agents will undoubtedly influence many purchasers in their favor

## BANKING AND FINANCIAL.

# BANKING HOUSE OF FISK & HATCH, 5 NASSAU STREET.

NEW YORK, June 6, 1873.

We recommend to our friends and customers for invest. ment of surplus Capital, or in exchange for Government Bonds, which can now be sold at unusually high prices, the following Securities of well-known character and established reputation.

THE CHESAPEAKE AND OHIO SIX PER CENT BONDS, principal and interest payable in Gold Coin in New York City; interest payable May 1 and November 1; issued in denominations of \$100, \$500 and \$1,000, either Coupon or Registered. Price SS 1-2 and accrned interest.

Also, the CHESAPEAKE AND OHIO SEVEN PER CENT BONDS, principal and interest payable in gold coin in New York City; interest payable January 1 and July 1. Bonds of \$1,000 each, Coupon or Registered. Price 90 and accrued interest.

The CHESAPEAKE AND OHIO RAILROAD is completed and in operation from Richmond to the Ohio River, 420 miles, at a cost, with the equipment, of over \$35,000,000, and the rapid development of the business of the Road indicates that its earnings for the ensuing twelve months will not be less than \$3,000,000, and or the succeeding year not less than \$5,000,000.

Pamphlets containing full information concerning the Road and the country it traverses furnished on application.

We also deal in Government Bonds, Central and Western Pacific, and other first-class Securities; receive deposits on which we allow, four per cent interest; make collections, and do a general banking tusiness. FISK & HATCH.

BANKING HOUSE OF HENRY CLEWS & Co., 22 Wall street, N. Y.

Deposit accounts of Mercantile firms and Individuals received; all facilities and accommodations granted usual with City Banks; in addition thereto 4 per cent interest allowed on all daily balances

Bills of Exchange drawn on England, Ireland, Scotland and the Continent; Travelers' and Mercantile Credit issued available throughout the world.

RAILROAD BONDS .- Whether you wish to BUY or SELL, write to

HASSLER & CO.,

No. 7 Wall street, New York,

# INVESTMENT HONDS.

The Northern Pacific Railroad Company having determined to close its 7:30 First Mertgage Gold Loan at an aggregate not exceeding thirty million dollars, and thereafter to pay no higher rate of interest than 6 per cent, on further issues of its bonds, th limited remainder of the 7 3-10 loan is now being disposed of through the usual agencies.

As the bonds of this issue are made receivable in payment for the Company's lands at 1.10, they are in constant and increasing demand for this purpose, and will continue to be after the loan is closed-a fact which much enhances their value and attractiveness as an investment.

The Company now has more than 500 miles of its road built and in operation, including the entire Eastern Division connecting Lake Superior and the navigation of the Missouri River; it has carned title to nearly ten million acres of its land grant, and sales of lands have thus far averaged \$5 66 per acra.

All marketable securities are received in exchange for Northern Pacifies.

FRIDAY, June 13, 1873-7 P. M.

The Roney Market and Financial Mitnation .- The principal events of this week have been the reduction of 1 per cent in the Bank of England rate; the large increase of \$6,502,800 in the specie line of our city banks, as shown by the Clearing House report of June 7, and a slight improvement in activity at the Stock Board, accompanied by firmness in prices towards the close.

Money on call has continued very easy at 3@6 per cent, the ruling rate being 4@5 per cent; the large increase in the bank reserves, caused by the Government gold disbursements in pay ment of five-twenties redcemed, which has carried their excess above the legal 25 per cent limit, up to \$10,815,325, is accepted as an indication that money is likely to remain very easy during the Summer.

In estimating the probable course of monetary affairs during another year it is to be remembered that the three per cent legal tender certificates have all been called in, and that the banks will no longer be embarrassed by the withdrawal of these certificates from their reserves, frequently at the periods when they can least afford to lose them. The general caution exercised in regard to obtaining a sufficient supply of money for regular business purposes may also have a material influence in averting an excessive stringency in money during the autumn months, which has by many parties been predicted. Commercial paper is in good demand at  $6\frac{1}{2}$  to 7 per cent for prime names, and the rates show that there is no pressure of paper on the market.

The caple on Thursday reported a reduction of 1 per cent in the Bank of England minimum rate of discount and an increase of £421,000 in bullion during the week. The rate is now 6 per cert. So large a reduction was not expected in the bank rate at this time—particularly as the advance to 7 only took place eight days previously—and it apparently shows that the directors think the specie movement towards London from the Continent is not spasmedic and temporary, but rather the indication of a more

permanent turn in the tide.

The Bank of France reports a decrease in specie the past week of 51,000,000 francs, resulting, no doubt, from the large payment by the government of 250,000,000 francs on the 5th inst. to the Germans.

The last weekly Clearing-house statement of New banks, rendered June 7, showed an increase of \$5,896,225 in the excess of reserves above the legal requirement, the whole of such excess being \$10,815,325. The total liabilities stood at \$241,909,900, and the total reserves at \$71,292,800.

The following statement shows the changes from previous week and a comparison with 1872 and 1871:

and a comparison with 1872 and 1871:

United States Honds, - Government securities have remained firm on continued purchases by foreign bankers, The same features heretofore noticed have prevailed as regards the scarcity of bonds and the consequent difficulty of obtaining round lots. The calling in of \$20,000,000 more five-twenties for redemption in September will also have the effect of strengthening prices. It is rumored that this call has been made in view of the payment in September of the \$15,000,000 Alabama money under the treaty of Washington, and that the transfer of funds will be made by converting them into U. S. bonds to be held subject to future orders of Congress. Closing prices daily have been as follows:

|                                           |          |        |         |        | June   |        |

State and Kallroad wonds -There have been few transac tions in Sinte bonds, and sales at the Exchange have been chiefly confined to Tennessees, Missouris, South Carolinas and North Carolinas. Tennessees to day were somewhat stronger, and sold up to 79% for the old issues and 79% for the new. We observe that the North Carolina special tax bondholders in this vicinity are invited to meet and listen to the reading of an opinion of Reverdy Johnson, of Bultimore, concerning their legal right to procure the collection of a tax for the payment of interest on their bonds.

There has been a fair business in old railroad bonds sold at the Board, and a better demand for new bonds. Union Pacific Incomes and Land Grants show a further recovery from the depression caused by the first excitement attending the commencement of the Government sait, and it seems probable that

mencement of the Government shift, and it seems probable that the favorable reaction in prices may still be continued.

With the first of July will commence the large semi-annual disbursements of dividends and interest, and as the prices of Government bonds are now high, and the prices of dividend-paying railroad stocks not so low as to offer special inducements to investors, the prospect seems good for an active investment demand for first-class railroad bonds.

The Commissioners of the Canal Fund of N. Y. State invite-proposals to be amound June 25 at 12 o'clock for a flower cent

The Commissioners of the Canar rand of X. 1. State invite proposals, to be opened June 25, at 12 o'clock, for a 6 per cent gold loan of \$2,328,000, under section 3, article 7, of the Constitution, the principal being r-imbursable on the first of July, 1891.

The N. V. Central & Iludson now offers to the public \$2,000,000 of the new consolidated mortgage of \$40,000,000, and scaled proposals will be received for \$2,000,000 of the currency bonds until posals will be received for \$2,000,050 of the currency bonds until July 2, \$39,000,003 of the loan being currency 7 per cent bonds and \$10,000,000 sterling 6 per cent bonds. The proposals must be for a price "flat," and may be made for any part not less than \$10,000, and must designate whether coupon or regis-tered bonds are wanted, the former being in the denomination of \$1,000 each and the latter of \$5,000 and \$10,000 each; a deposit of 5 per cent must also accompany the proposals. The bonds of 5 per cent must also accompany the proposals. The bonds will be ready July 10th. The \$10,000,000 6 per cent gold sterling bonds were recently negotiated in London at about 110 in currency in our money

Railroad and Miscellaneous Stocks.—The stock market has shown more activity, but previous to Thursday the tone was weak and irregular; for the past two days, however, there has been decidedly more firmness, and prices have advanced, closing at about the best point reached. The business, as usual, has been in the leading speculative stocks, and in some of these the depression early in the week invited purchases, with a view of profiting by a subssquent upward turn. St. Paul has been weak, but upon what grounds it does not yet appear, unless the reported failure of pooling operations with the Chicago and Northwestern Company may have had some effect. Mr. Tracy has been re-elected President of the Northwest Company, against his inclination and request, and it is reported that he will resign at the meeting of the directors to be held in this city on the 19th. It is not known who will be elected in his place, and the subject is discussed with much interest. Jay Gould is well-known as a large holder of the common stock, ever since the famous corner. With the expectation of a decidedly easy money market for several months to come, and the return to New York of the leading directors and operators after having settled the management of their several companies for another year, the prospect seems good at the moment for a renewal of activity in some of the leading speculative stocks.

The daily highest and lowest prices have been as follows: Railroad and Miscellaneous Stocks .- The stock market

The daily highest and lowest prices have been as follows:

The Gold Market. Gold has declined just 1 per cent during The Gold Market.—Gold has declined just 1 per cent during The Gold Market.—Gold has declined just 1 per cent during activity in the market, and the week. There has been no great.—The gradual dethe lowest price made was 116% on Thursday.—The gradual dethe lowest price made been influenced chiefly by the activity ment disbursements for five-twenties, the better aspect of foreign trade balances, and the prospective payment of the \$15,000,000 Alabama treaty money in September, together with the fact that \$20,000,000 more of five-twenties are called in for at that time. There is less heard just now of a sharp advance in gold, and the future operations of the clique are apparently out little known. The rates paid for carrying to-day were 4, 3½, ½, 5 and 3 per cent, and flat for borrowing. At the Treasury sale of \$1,500,000 on Thursday, the total bids amounted to \$3,475,000. Castoms receipts of the week amount to \$1,862,000.

The following table will show the course of the gold premium each day of the past week: Ohio & Mississippi.

each day of the past week:

Foreign Exchange.—There has not been much activity in foreign exchange, and the reduction of 1 per cent in the Bank of England rate has apparently had little effect upon rates; the actual result of that change, however, has been seen in an approximation of sixty days' and short sight rates, which are now nearer together than usual. At this season of the year we generally look for high rates of exchange, and a considerable export of gold, and it remains to be seen whether a more favorable trade movement, and the considerable export of U. S. honds to London, together with the prospective payment of the Alabama treaty money, will have sufficient influence to affect materially the usual course of the market. Quotations are as follows:

# STATE, CITY AND CORPORATION FINANCES.

EXPLANATION OF STOCK AND BOND TABLES.

1. Prices of the most Active Stocks and Bonds are given in the "Bankers' Gazette," previously. Full quotations of all other securities will be found on preceding pages.

2. Government Securities, with full information in regard to each laste, the periods of interest payment, size or denomination of honds, and namerous other details, are given in the U. S. Debt statement published in The Chronelle on the first of each month

3. City Bonds, and Bank, Insurance, City Rallroad and Gas Stocks, with quotations, will usually be published the first three weeks of each month, on the page immediately preceding this.

4. The Complete Tables of State Securities, City Securities, and Railroad and Miscellaneous Stocks and Bonds will be regularly published on the last Saturday in each month. The publication of these tables, occupying fourteen pages, requires the issue of a supplement, which is neatly stitched in with the usual cdition and furnished to all regular subscribers of The Curronicle.

Virginia Bonds Garant Ass Borger Scoond Anditor of

Virginia Bonds.—General Asa Rogers, Second Auditor of Virginia, announces that the interest on the public debt of Virginia, announces that the interest on the public debt of Virginia for July 1, as prescribed by the act of March 13, 1873, will be paid at his office on and after July I next, and that the sterling interest will be paid in London at the same time by Baring Bros. & Co., the agents of the State. The Richmond Dispatch says: "It is well for the holders of stock which has not been funded to know that the old bonds or certificates must be presented to the Second Auditor, that the interest paid them may been funded to know that the old bonds or certificates must be presented to the Second Auditor, that the interest paid them may be stamped upon such stock. It is estimated that after paying the July, 1873, interest and the arrearages of interest of 1872, there will be money enough in the treasury on the 1st of January, 1874, to pay the 4 per cent interest which will then have accrued, and leave a balance of over \$500,000 for the current expenses of the State government. Allowance is made in this estimate for the payment in 'tax-receivable coupons' of one-half of the public revenue due in December next, while the fact is that up to the present time a much smaller proportion of the revenue has been thus paid, the holders of large amounts of the bonds of the State believing it to be better to take the 4 per cent now tendered and the obligation of the State for the remainder payable hereafter."

Louisiana Debt.—Governor Kellogg has issued an order to

Louisiana Debt.-Governor Kellogg has issued an order to the following effect, in conjunction with another requiring quarterly publication by the State Anditor of the collections, outstanding warrants, total bonded debt, &c.:

outstanding warrants, total bonded debt, &c.:

Whereas, Much uncertainty exists in the public mind as to the origin, nature and binding effect of many of the outstanding obligations of the State, and to the end that the validity of all obligations of the State may be fully known with a view to any action in the courts or before the Legislature which may hereafter be deemed necessary, I do hereby designate the following citizeus, to wit, Moses Greenwood, Louis Schneider, John Phelps, Bernard Soulie, J. C. Dennis, B. F. Joubert, George L. Bright, I. N. Marks, and Joseph P. Hornor, Esq., to constitute a committee to examine, ascertain classify and report regarding the amount, nature, constitutionality and binding effect of all and every of the outstanding obligations of the State, and to make report thereon before the meeting of the next Legislature, or as soon as in their judgment may be expedient.

South Carolina Finances.—It will be remembered that Messrs.

This respondent further shows and charges that, to the extent at least of \$7,194,700, the aggregate herein above referred to is not the valid debt of the State, and that the bonds commerated in said report, if ontstanding, are to that extent outstanding without authority of law.

Jersey City Bonds.—The Jersey City Board of Finance has ordered the issue of bonds, not to exceed \$750,000, to meet the expenses of the city to December 20, under the law authorizing the changing of the beginning of the fiscal year to that date.

Clark County (Mo.) Bonds.—The County Court of Clark County, Missouri, on the 27th day of May, 1873, made an order County, Missouri, on the 27th day of May, 1873, made an order that notice be published warning all persons against purchasing certain railroad bonds of said County of Clark, issued by the authority of the County Court of said county in iavor of the Missouri & Mississippi Railroad Company, dated June 1st, 1873—300 bonds for the sum of \$500 each and 50 bonds for the sum of \$1,000 each, amounting altogether to the sum of \$200,000—as they were obtained from said County Court by said railroad company, its officers and agents, by fraud and corruntien. officers and agents, by fraud and corruption.

Southern Railway Security Co.—At the annual election of this Company held June 3, the following officers were elected for the ensuing year: President, James Roosevelt. Directors, Thomas A. Scott, Philadelphia; James Roosevelt, New York; M. K. Jesup, New York; H. B. Plant, New York; R. T. Wilson, New York; G. W. Cass, New York; D. Willis James, New York; B. F. Newcomer, Baltimore; W. T. Walters, Baltimore; J. D. Cameron, Hanvishung.

Mississippi Central Extension.—Grading on this line was began last September, but the extraordinarily severe winter and the wet spring have caused progress to be slow. About 27 miles of track has been completed from Jackson, Tenn., northward to Milan, where a junction is made with the Memphis line of the Louisville & Nashville Railroad.

# Mobile and Ohio Raliroad.

Mobile and Ohio Railroad.—
The Mobile & Ohio Railroad is the great trunk line which, commencing at Mobile, Ala., terminates at Columbus, Ky., in a distance of 472 miles. The original charters granted by the States of Alabama, Mississippi, Tennessee and Kentucky, through which States the road passes, contemplated a line between Mobile, Ala., and Cairo, Ill., and a junction with the Illinois Central Railroad; but for financial reasons the line has yet only been completed to Columbus, Ky., whence the proposed connection is at present made by steamboat. The wanting link, however, is now being constructed, and the through line ⊶rom Mobile to Lake Michigan and the Upper Mississippi River will be completed at no distant day.

Module to Lake Michigan and the Upper Mississippi River will be completed at no distant day.

The gross earnings, which in 1868 amounted only to \$1.850,601, were in 1873 \$2,952,507, showing an increase of \$1,101,906, or 50.95 per cent. In the same two years the nett earnings were \$600,049 and \$1,022,288 respectively; and the increase \$422,239, or 70.37 per cent. This increase has been steady and uniform from year to year, and fully proves the inherent vitality and strength of the enterprise.

At their annual meeting held in Mobile April 15, 1873, voted

strength of the enterprise.

At their annual meeting held in Mobile April 15, 1873, voted to increase their capital stock share for share, and distribute the new stock to the present stockholders at par, 75 per cent as a dividend, represented by property acquired by the company, and 25 per cent to be paid for in cash, the proceeds of which are to be applied to the extinguishment of the floating debt and the further improvement of the property. It is anticipated that this course will relieve the company from all financial difficulties, and lead to the inauguration of an early dividend paying period in the history of the company. in the history of the company.

# Boston, Concord and Montreal Railroad.

The Boston, Concord & Montreal Railroad.—

The Boston, Concord & Montreal Railroad was chartered by an act of the New Hampshire Legislature, approved December 27, 1844. Construction was commenced in 1846, and the road opened for through traffic in May, 1853. The White Monntains Railroad (Wells River to Littleton), 20 miles, was leased February 1, 1859, and since 1869 has been extended, in the interest of the Boston, Concord & Montreal Company, to Northumberland, on the Grand Trunk Railway of Canada, a further distance of 30 miles, with a branch from Wing Road (27 miles north Wells River) to Plerce's Mills, about six miles. It is now proposed to extend the main line up the valley of the Connecticut River to and beyond Colebrook, and to carry the branch from Pierce's Mills to the Twin Mountain House. This latter improvement will greatly expedite the travel to the White Mountains. The increase of rolling stock has been for several years very large. The extension, branch, and other works connected therewith, have cost about \$900,000, which has not yet entered on the company's accounts, and will be paid for in bonds. The White Mountains Railroad, during last year, was provisionally purchased by the company on the basis of an exchange of the existing stock (\$200,000) for the Boston, Concord & Montreal Company's bonds. For these purposes, and for the purpose of taking up all previous issues, the company are about fo issue consolidated mortgage bonds to the extent of \$3,000,000.

The company are new considering a project to build a railroad under the charter of the Argedith and Conventy Pailroad Conventy. The Boston, Concord & Montreal Railroad was chartered by an

The company are new considering a project to build a railroad under the charter of the Meredith and Conway Railroad Company from Meredith village (37 miles north from Concord) to Centre Harbor and Ossipec, and finally to Conway.

been sold only 21,772 acres, leaving an area still belonging to the company of 176,256 acres. The sales in 1872 aggregated 3,912 acres, purchased by 124 persons for \$10,816, or at an average of

2.76 per acre. At the close of the late war the company found their road and At the close of the late war the company found their road and equipment a wreck and their financial condition very discouraging. With skillful management and great energy, however, they soon set matters right, raising, through friends both in the North and in Europe, means to reconstruct their property and recommence business operations. In the next year (1866) they issued a general 7 per cent mortgage and funded in the new bonds all previous mortgages and their floating debt to the amount of \$3,000,000, thus relieving themselves from vexatious pressure by creditors, and placing their property on a proper feoting. For a time interest, as it became due, was paid in preferred stock, but now the earnings are sufficient to pay 4 per cent in cash, the remaining 3 per cent being still paid in preferred stock.

The roadway and rolling stock are in general good condition, but before it can enter into the family of great through roads it will have to be relaid with heavy iron and receive heavier rolling

will have to be relaid with heavy iron and receive heavier rolling will have to be remain which stock than it flow possesses.

Hunnibal & St. Joseph Railroad.—Sealed proposals will be received until Friday, June 20, 1873, at noon, for the sale of \$50,000 of the land boads of this company to the trustees, in accordance with the provisions of the mortgage, dated April 1, 1863. The bids will be opened in Boston on Saturday, June 21, 1972, and the control bids declared. 1873, and the accepted bids declared.

—The representatives of the Freach bondholders of the Memphis & El Paso Railroad have finally compromised with the Texas & Pacific company.

Indiana & Illinois Central.—The work of laying the track on the western division was completed May 16. The western the western division was completed May 16. The western division extends from the Wabash River at Montezuma, Ind.. to Decatur, Ill., 85 miles. Of this 55 miles have been built since October last—30 miles across Douglas county, Ill., having been completed last summer. The whole road will be open for completed last summer. The whole road will be open for business as soon as the filling and surfacing are done and the business as soon as the filling and surfacing are done and the necessary side tracks laid. Connection is made with the Evansville, Terre Haute & Chicago road west of the Wabash. A number of New York capitalists, comprising the officers of the Indiana & Illinois Central—II. B. Hammond, President; George Walker, Treasurer and Secretary; Chauncey Vibbard, Charles Dana, W. H. Given, directors; W. R. Sands, James Ernott, C. N. Shaw, J. G. Johnson, J. L. King, E. W. Bird, J. J. Bingham; also W. R. McKean and Chambers Patterson, of Terre Illaute, have just been out to inspect the completed road. have just been out to inspect the completed road.

Indianapolis, Cincinnati & Lafayette.—In the United States Court at Indianapolis, Thomas A. Morris and M. E. Ingalls, receivers of the I., C. & L. Railroad, which has been in their hands as receivers and assignees in bankruptcy for several years, made their final report June 6. It says all the matured interest on the several classes of bonds have been eitler paid or satisfactorily provided for, except a small portion not presented for payment. The outstanding indebtedness of the receivers contracted in the course of the administration of the trust is about as follows: Current monthly expenses for May, \$60,000 (but the receivers say this will be met in whole by the receipts during the same time); second, \$125,000; expended for iron and bolts used in repairing the road; May 3, \$112,000, borrowed for the purpose of partly paying for ears and locomotives; 4th, \$160,000 unpaid balance due on 300 freight cars purchased. They hold in trust the following property and equipment acquired in the management of the trust: Iocomotives, upon which \$57,000 has been paid; tenders Indianapolis, Cincinnati & Lafayette.-In the United States trust: Iccomotives, upon which \$57,000 has been paid; tenders worth \$15,600; cars upon which \$83,000 has been paid. The receivers in closing say they will be enabled by the permission and authority of the court to provide for \$297,000 of this outstanding indebtedness, contracted in the execution of this trust, by the advancement of that sum of money from John Kennedy, Joseph S. Fry and Samuel J. Broadwell, Trustees of the stockholders of the company, in case the property held by the receivers, and in which they have an interest, to that amount be turned over to them for security. The receivers are advised that it is contemplated between said railroad company and said Trustees that the former shall reimburse the latter by means of an equipment bond loan to be made by it, based upon said cars, locomotives and tenders.

After the receipt and application of said \$297,000, there will remain of liabilities contracted by the receivers \$159,400, \$60,000 of which is for current expenses of May, and which will be liquidated by receipts during the same month. The remainder, \$100,000, the railroad company will assume, and pay as it matures. There are of bonds and stocks assets belonging to said trust sufficient to secure the payment of any unpaid liabilities contracted by the receiver and to be assumed by the railroad company, if in the judgment of the Court the same shall be held as security for such

payment.

In addition to these stocks and bonds, the receivers held about \$15,000 worth of coal, old iron and rails worth \$50,000, and supplies for shop uses worth \$5,000. Wherefore, the purposes of said trust being virtually ended, the receivers ask instructions of the court as to the final disposition of the property in their

the court as to the final disposition of the property in their hands, and that upon a final settlement of their accounts as receivers they may be discharged.—Cincinnati Gazette.

The Court reversed the judgment of the District Court, but directed that the proceedings in bankruptcy should be terminated upon the company's continuing the deposit of U.S. bonds in favor of Charles Dwight, and depositing with the Clerk of the District Court \$50,000 of mortgage bonds of the said railroad, of the issue of 1869, to secure any demands of the Whitewater Valley Rail road Company, and upon its giving other satisfactory security in the sum of \$8,000 for the repayment of the sum paid by the Whitewater Valley Railroad Company to the Globe Bank of Boston, if the same should be ultimately established as a valid claim against the Indianapolis, Cincinnati & Lafayette Railroad Com-

Peninsular of Michigan.—A meeting of the stockholders of this company will be held at Battle Creek, Mich., July 30, at 2 P. M., for the purpose of considering and deciding upon an agreement made by their directors with the directors of the Port Huron & Lake Michigan Company for the consolidation of the two com-To connect their two roads it will be necessary to conpanies. To connect their two roads it will be necessary to construct a line from Lansing, Mich., east by north about 50 miles to Flint. With this and with the extension of the Peninsular in Indiana to Valparaiso, where it is to connect with the Pittsburgh, Fort Wayne & Chicago, and with running rights over that road into Chicago, which we believe have been agreed upon, the consolidated company would be able to run trains through between Chicago and Port Huron by a short route, and at the latter place make connection with the Grand Trunk and Great Western of Canada. The country through which the line passes is so cut up by reilroads that local traffic at host worth as well divided and by railroads that local traffic at best must be much divided, and the local markets, both for buying and selling of most of the country through which the line runs are at Detroit and Toledo, and cannot well be reached by this line.—Railroad Gazette.

Lake Erie & Louisville.—The decision of the Superier Court annulling the Boesel Railroad law, has very seriously affected this road. The work of laying the track between Lima and St. Mary's was suspended last week, and will probably remain so until the latter place can raise \$30,000. The track is laid to Bucklan'l, on the Auglaize river, eight miles from St. Mary's, and twelve miles from Lima. twelve miles from Lima,

N. Y. & Oswego Midland Railroad .- In accordance with the previously announced programme a formal reorganization has taken place by the election of George Opdyke as President, and B. Schlessinger, of the firm of Naylor & Co., Treasurer. The Board of Directors was also changed to suit the views of those

board of Directors was also changed to suit the views of those who agree to supply money for the completion of the road.

It is stated that the following now constitute the new Board of Directors: George Opdyke, DeWitt C. Littlejohn, John R. Clarke, Barthold Schlessinger, E. A. Wicks, Conrad N. Jordau, Charles L. Perkins, Henry Wheelan, H. E. Bartlett, Josiah Macy, Jr., J. W. Merchant, and Henry R. Low. It is stated that the money (\$4,000,000) has been subscribed, and the road from Oswego to New York will be completed in Luly. New York will be completed in July.

In accepting the presidency of the reorganized company, Hon.

George Opdyke writes the following letter:

No. 25 Nassau street, N. Y., June 7, 1873.

To the Board of Directors of the New York & Oswego Midland Railroad Company :

GENTLEMEN-Since you tendered me a few days ago the presidency of your company, I have carefully examined its maturing floating debt, incurred for its equipment and other necessary ontlay, together with the maturing interest on its funded debt, has in the presence of a dull market for the mortgage bonds of unfinished railroads led to financial embarrassment. This is the common experience led to financial embarrassment. This is the common experience of most raihoad enterprises as they approach completion. I am satisfied, however, that the intrinsic merits of yours, aided by the large syndicate subscription that you have secured to your first mortgage western extension bonds, together with other resources at your command, will enable you to promptly overcome your present embarrassment and to successfully carry forward your important work to early completion.

Prompted by this belief and by an earnest desire to contribute

my best efforts to protect the interests of the creditors and stockholders of your company, and to aid in securing to the city and State the great benefits that this road must confer, I have determined to yield my strong personal objections and to accept the position you have tendered me. I feel that I may confidently rely on your earnest co-operation in every measure requisite to the early completion and ultimate success of the great work that

has been placed in our hands

I am persuaded that with the means at our command, combined with proper energy and economy, the credit of the company can be promptly restored, the line to Oswego completed within thirty days, and the line to Buffalo within twelve months from this date When this shall have been accomplished no intelligent person can doubt the permanent success of the enterprise, nor the immense benefits it will confor on the citizens of our State.

Yours, very respect ully, GEORGE OPDYKE.

St. Joseph & Denver City Railroad Bonds.—A meeting the bondholders of the St. Joseph & Denver City Railroad of the bondholders of the St. Joseph & Denver City Railroad was held on Wednesday at the office of Hassler & Co., No. 7 Wall street. About one hundred persons were present, and, with others, were said to represent near \$3,000,000 of the bonds. As each person entered the room, he was requested to fill in a printed form showing the amount of his bonds, their character (whether white or yellow, i. e., Eastern or Western Division bonds), and to sign his name and address. A large number complied with the request, but others declined to do so. The meeting organized by the election of James H. Fisher, of Buffalo, as Chairman, and G. H. Bonner as Secretary. Mr. Hassler made an address relative to the inducements which had been offered to investors in the bonds, declared that land grant bonds had been issued by the company declared that land grant bonds had been issued by the company before a patent for the land had been granted by the Government, and that a title to much of the land was disputed. He said that the bonds could have been disposed of to investors at 971, and they were now effered on the market at 31‡, with the February interest unpaid. He urged union among the bondholders for protection. At the close of his address a resolution adopted authorizing the chairman to appoint a committee of five, whose duty it should be to investigate the condition of the St. Joseph & Denver City Railroad, and report to a subsequent meeting of the bondholders, or by circular letter to all who participated at the present meeting. Charles Hassler, Chauncey Vibbard, F. Kingman, J. Augustus Johnston, and G. H. Bonner were appointed such committee. It was decided by resolution that all who availed themselves of the benefits derived from the efforts of the committee should be assessed pro rata at a rate not exceeding one per cent on the amount of the bonds held. The meeting then adjourned, subject to the call of the committee.

Northern Pacific.—The Secretary of the Interior has decided that under the sixth section of the act of Congress granting land to aid the construction of the Northern Pacific Railroad, the filing of the map of the general route protects the company from pre emption settlements within the granted limits, which in the States are twenty miles on each side of the line.

Ohio & Mississippi Railroad.—It is stated that the \$400,000 Ohio & MIssissippi Railroad.—It is stated that the \$400,000 of the bonds of the Ohio & Mississippi Railroad, the issue of which has heretofore been noticed, were disposed of at 80, half of the proceeds being used to pay off floating indebtedness and the remainder for the purchase of the steel rails. It is understood that the remaining \$600,000 will be withheld from the market until the return of the President frem Europe.

Schenectady & Susquehanna.—This road is to be sold at anction, under foreclosure of the second mortgage bonds, in Schenectady, N. Y., July 10. The road is about 15 miles long, from Schenectady to Quaker street on the Albany & Susquehanna

# The Commercial Times.

# COMMERCIAL EPITOME.

FRIDAY NIGHT, June 13, 1873.

The markets the past week have been tairly active, with prices showing but slight variations if we except the excitement in cotton, which is fully reported on another page. The activity has been most decided, of course, in breadscutts, as this is the season for it. There is probably some growth of confidence in the safety of the markets at current prices, none of the leading staples being believed to be high, except cotton, perhaps, which has been subject to strong speculative influences. Money has become easy and collections are reported more satisfactory. The weather has become very satisfactory in most sections, though complaints of rain at the South, and the want of it in the Middle Western States, are still heard.

Provisions have been variable. New mess pork has been moderately active at an advance. Transactions have been at \$16 60 on the spot, \$16 624 for June, \$16 75 for July, and \$16 874 for August. Old mess has sold to a small extent at \$16, prime mess at \$16.75, and extra prime at \$14. Lard has been variable, owing to speculative manipulations. Prime Western has sold on the spot at as high as 9c, for June at 9 1-16c, for July at 91@95-16c, and for August at 93@99-16c. Bacon has been a little more active, at a further decline; long clear has sold at Sc, while for short clear, in which the main business has been done, 8½c has been accepted. Other cut meats have been in moderate demand, and prices steady. Some business in dry salted hams has been reported at 10gc, and in clear bellies at 91@94c, with a good business in bulk ments. Beef has continued quiet, as before. Butler has been in pretty good demand, and fine Western has ruled rather steady. Cheese has declined, with large receipts, and the highest price latterly obtainable from exporters has been 14½c for fancy for the London market; but the ruling figure for "fine" for several days past has been 14c. To-day perk was quiet, with some transactions in new mess, however, at \$16 62½c on the apot and for June. Lard was moderately active, and prime Western sold for June at 8½c, and quoted 9½c for July and 9½c for August. Bacon and cut meats were steady. The following will show the gravette of praying and them. New York to foreign ports from Nov. Bacon and cut meats were steady. The following will show the exports of provisions from New York to foreign ports from Nov. I to June 10, inclusive, for three years:

|            | 1872-73.    | 1871-72.     | 1870-71.   |
|------------|-------------|--------------|------------|
| Porkbbls   | 118.638     | 102,770      | 98,865     |
| Beefpkgs   | 72,214      | 66,765       | 117,078    |
| Lardibs    | 131,751,066 | 120,861,874  | 58,191,585 |
| Baconlbs   | 256,017,293 | 162,245, 517 | 47,559,354 |
| Batterlbs  | 2,130,222   | 3,036,074    | 2,499,142  |
| t heeselbs |             | 13,400,044   | 20,641 344 |
| Tallowlbs  | 34,261,687  | 87,882,974   | 15,136,72  |

Ocean freights have been fairly active at full rates. To Liver pool, by steam, there was some business early in the week at 11@ 11½d. for grain, but there was an early recovery to 11½@12d., with large shipments vesterday at these rates; the rate for cheese is 60s.; for bacon, 50s., and for cotton, 1@5-16d. There have been moderate shipments of breadstuffs to London, Bristol, &c., at full To Cork, for orders, charters have generally been at 8s. 6d. Petroleum charters have embraced vessels to direct ports on the Continent at 6s@6s. 6d.; to the Baltic, 7s. 3d.@7s. 6d., and to Trieste, 8s. 3d.; rosin to Leghorn, \$1-25, and light pipe staves to Cadiz, at \$45. To day room for grain by the British steamers was very scarce, and higher rates were quoted.

Petroleum has been dull and depressed, with a sharp decline in crude in the producing districts; closing quotations are 84@ 85c. for crude, in bulk; 194c. for refined, in buls., and 25@254c. in cases, and 101@lic. for naptha.

| Export since Jan. 1— | 1873.      | 1872.      |
|----------------------|------------|------------|
| From New Yorkgalls.  | 51,497,614 | 29,537,026 |
| Other ports          | 27,738,408 | 20,400,012 |
| Totalgalls.          |            |            |
| Same time 1871       | galls.     | 53,852,468 |
| Same time 1870       |            | 46,007,263 |

Rosin has been dull at \$2 90@3 for strained, though the decline Rosin has been dull at \$2 90@3 for strained, though the decline has led to some export movement. Spirits turpentine declined to 45c., leading to free sales. Tallow has been dull at \$\frac{1}{2}\sqrt{9}c. Whiskey has declined to 93\frac{1}{2}c., leading to more activity. Hides have been fairly active, and have ruled firm at prices last quoted, but leather has declined under large supplies.

Metals have been generally dull, with weakening prices. American ingot copper is quoted at 29\frac{1}{2}\sqrt{3}0c. cash, with little doing. No. 1 American pig iron is quoted at \$46\sqrt{9}48, and 250 tons Glengarnoch Scotch sold at \$16. Straits in is lower at 30\frac{1}{2}\sqrt{3}1c. gold, and dull. Calcuta linsted has declined to \$2.60 cash, and \$2.65

and dull. Calcutta linsced has declined to \$2 60 cash, and \$2 65,

90 days, gold. Tobacco has been more active for Kentucky leaf at unchanged prices. The sales for the week aggregate about 1,000 hlids, of which 800 hlids for export and 200 hlids for consumption. Prices of new crop are quoted at 7@8c for lngs and 9@14c for leaf. Seed leaf has been only moderately active, prices showing no decided change. Sales have been: Crop of 1870, 200 cases sundries, at Sallo; erop of 1871, 400 cases sundries, 7@55c: crop of 1872, 60 cases Wisconsin, 6, and 78 cases Ohio at 6@6½c; also 50 cases Wisconsin, crops of 1871 and 1872, at 6c. Spanish tobacco has materially declined, leading to more activity. Sales, 1,100 bales Havana at 80@92½c, and 200 bales Cuba on private terms.

Exports of Leading Articles from New York.
The following table, compiled from Custom House returns, show a the exports of leading articles from the port of New York sinc January 1, 1873, to all the principal foreign countries, and also th totals for the last week, and since January 1. The last two lin show total values, including the value of all other articles beside

# COTTON.

FRIDAY, P. M., June 13, 1873.
By special telegrams received to-night from the Southern ports By special telegrams received to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, June 13. It appears that the total receipts for the seven days have reached 18,245 bales against 25,130 bales last week, 30,906 bales the previous week and 34,044 bales three weeks since, making the total receipts since the first of September, 1872, 3,456,509 bales against 2,678,045 bales for the same period of 1871-72, showing an increase since September 1, 1872, of 778,464 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of the five previous years are as follows:

We have had an excited market for cotton the past week, attended with a marked advance in prices, though at the close a decided reaction had set in. This advance was based upon the improvement at Liverpool, assisted by the decreasing stocks here and the considerable short sales, and further by the reports from the South of rain, and consequent damage claimed to have resulted to the crop. All these circumstances taken together have helped forward the speculation, and served to makemore easy the cornering of the shorts. Monday a revision of quotations took place; good ordinary, which had previously been quoted at 16½@16½c. for Uplands and Gulf, were all quoted alike at 16½c., and strict good ordinary and all better grades were advanced ½c. Wednesday there was a further advance of ½c., except for ordinary; and Thursday all growths were quoted alike, middling Uplands being advanced ½c. to 20½c., and middling Orleans ½c. to 20½c. To-day quotations remained unchanged, but were nominal. For future We have had an excited market for cotton the past week, Thursday all growths were quoted alike, middling Uplands being advanced \( \frac{1}{2}c. \) to \( 20\frac{1}{2}c. \), and middling Orleans \( \frac{1}{2}c. \) to \( 20\frac{1}{2}c. \) To-day quotations remained unchanged, but were nominal. For future delivery there has been the same activity and buoyancy, the advance being scarcely less decided. The etrength of the market consisted in the demand to fill contracts, and the business has been mainly for the next two months. Latterly September delivery has been more active. On Wednesday, when August touched 20c., there was a large increase in the offerings, and some reaction took place; but early on Thursday morning the suspension of a leading house operating for a decline was announced, when there was renewed excitement, and a further advance took place, the highest prices reached being 20\frac{1}{2}c. for July, 20\frac{1}{2}c. for August, 19\frac{1}{2}c. for September, and 18\frac{1}{2}c. for October. But the emergency over, and there being no further failures, prices became weak, and after 'Change a considerable portion of the advance was lost. To-day the market oponed flat, but with the advance was lost. To day the market oponed flat, but with reduced offerings and needy buyers, very nearly the highest prices of yesterday were reached. Later the market was lower, and after 'Change the lowest prices of the day were made—for July 19 15-16c., for August 20c., for September 18‡c., and for October 18‡c. The total sales of this description for the week are 131,850 bales, including—tree on board. For immediate delivery the total sales foot my this week 9 469 bales including delivery the total sales foot up this week 9,469 bales, including 2,656 tor export, 5,307 for consumption, 806 for speculation, and 700 in transit. Of the above 364 bales were to arrive. The following are the closing quotations:

WEATHER REPORTS BY TELEGRAPH.—Elsewhere we give day our annual report of acreage. With that as a basis, we to-day our annual report of acreage. With that as a basis, we are able the more intelligently to consider and weigh our telegraphic information with regard to the weather. This week's, and in great part last week's, dispatches should be taken as supplemental to that report. It will be seen that to night our telegrams differ in their tone quite materially. This we think is explained by the fact that the storms of the last three week's have explained by the fact that the storms of the last three weeks have net been continued rains, but local sterms. At some points there have been frequent but light rains, while at others the rains have been equally frequent, but heavy. That such wet weather should result in the abandonment of a portlon of the crop, where so much has been planted, cannot be a matter of wonder. Our new Orleans correspondent telegraphs that it has rained there every day but one—heavy showers. At Mobile it has also rained every day but one, four days heavy, and it is now raining; much damage is foured, and we already hear of large tracts of land under cotton being abandoned on account of the grass and weeds. Our Selma correspondents state that it has rained there more than half the correspondents state that it has rained there more than half the week, but not heavily, though, and as the week closes there is a favorable change; no serious damage has been done. At Mont gomery it has rained on every day; farmers are working hard fighting grass. There are rumors of caterpillar, but they are of no importance. There has been rain at Macon on every day but one; the grass is becoming very troublesome. Our Columbus telegram has failed to reach us. At Augusta it has only rained on one day, the rest of the week being pleasant; crop accounts are improving; the cotton plant looks strong and heathly. Our Charleston correspondent does not state the number of days they are improving; the cotton plant looks strong and healthy. Our Charleston correspondent does not state the number of days they have had rain, but says the early part of the week was clear and pleasant, but the latter part has been rainy; as the week closes, however, there is a favorable change; good progress is being made in clearing the fields of grass. At Nashville they had rain early in the week, but the latter part of the week has been clear and pleasant; crop accounts are favorable. There has been rain on four days at Memphis; Tuesday night was the heaviest ever known here; very much damage has been done; We hear of large tracts under cotton being absidored on account We hear of large tracts under cotton being abandoned on account of the grass and weeds. The thermometer at Memphis has averaged 79, Montgemery 83, Mobile 79, Savannah 71, Selma 82.

CONTRACTS IN FUTURES—THEIR LEGALITY, ETC.—Since the war the transactions in cotton have increased many fold. In fact the -Since the new business in futures has sprung up which has become extremely popular, because, although liable to abuse, it results in many and great advantages both to the planter and consumer. Lately, however, a question has arisen as to the legality of these contracts, in an action brought by the Messrs. Lehman Bros. of this city, and an Alabama jury has pronounced them illegal, and the Court on appeal has affirmed the judgment. As this question will be, we understand, speedily carried to our court of last resort, we should not refer to it at present were it not for certain comments of some not refer to it at present were it not for certain comments of some of our Southern exchanges which strike us as very unfair, calling this style of dealing gambling, and congratulating themselves that future contracts are no longer legal, having been the ruin of the South." Our readers are fully aware that we do do not favor simple speculation, and have no sympathy with the losers on either side, and yet we should be very sorry to see this decision the law of the land. Nor have we any fear that it will be. Dealings in futures are no novelty, for they have been a recognized mode of transaction in European ports for rape seed oil, bemp, &c., ever since the Napoleonic wars. Liverpool, upon the first establishment of channel telegraphs to the continent, npplied them to cotton in its dealings with continental spinners, and the moment the Atlantic cable became a fixed institution futures in cotton were introduced among us. Even prior to that such contracts were in use in other trades. Ten years ago petroleum was sold months ahead in our market. Now, transactions of this description have become a necessary leading element in modern cription have become a necessary leading element in modern merchandize dealings as well recognized as any other form of agreement, and although at first received with little favor by our older merchants, they have finally been accepted by all as of great service in every branch of trade when rightly used.

But we stated that this mode of dealing is a decided advantage to the planter. We have not the space to-day to develop this idea as fully as we would like, and yet it will require only a moment's

reflection to see many ways in which he receives benefit. For instance, every one knows that the most of the cotton produced is grewn on borrowed money, and that the dilliculty or facility with which the needed money is obtained is a very important element in the cost of the crop. Under this new system the country merchants can now sell cotton in New York for October delivery at chants can now sell cotton in New York for October delivery at about 18½c., and hence he has a sure basis upon which he can negotiate with the planter, and will, of course, make the required advances on much easier terms than he could do if he were ignorant as to whether he could get in October 12c. or 18c. per pound for the cotton. Then, again, the planter has all the time he is producing his crop to take advantage of the market. Whenever he thinks the prices are right he can sell. In olden times he had to accumulate and store it at great expense and risk, frequently to be forced into the lowest market by his factor, after paying a ruinous interest on an uncertain value as a basis. Or if the planter desires to held his cotton to a later date, he can still realize upon it, and buy a contract for a future month, being at no greater risk as to price, and at much less expense than if he had to store and keep the cotton as under the old system. That the purely speculative dealers are at times caught and lose largely is of little interest to the people at large—that is simply the abuse of the system.

As to spinners and shippers, the system is a great safeguard. The spinner makes a contract for goods to-day, and covers it with

The spinner makes a contract for goods to-day, and covers it with cotton at ence, to be delivered when he will need it. Thus he fixes his profit and saves interest. But we have not space to enlarge further upon this question. It is evident that it is not in the interest of the producer or of any dealer in cotton that the transactions in futures be done away with.

ACREAGE IN COTTON IN 1873 .- For our annual report of acreage in cotton this year we would refer our readers to our editorial

BOMBAY SHIPMENTS,--According to our cable dispatch received BOMBAY SHIPMENTS.—According to our cable dispatch received to day, there have been 44,000 bales shipped from Bombay to Great Britain the past week and 11,000 bales to the continent, while the receipts at Bombay, during the same time have been 22,000 bales. The movement since the first of January is as follows. These are the figures of W. Nicel & Co., of Bombay, and are brought down to Thursday, June 12:

-Shipments this week to—
Great ConGreat ConGreat ConWeek's

Shipmeats since Jan. 1 to— Great Con-Britain, tinent. Total 568,000 160,000 728,00 Total. receipts. 728,000 22,000 739,000 28,000 Great Con-Britain tinent. 1873.... 44,000 11,000 Total. 55,000 1372.... 26,000 512,000 227,000 1372.... 26,000 1,000 27,000 1871.... 47,000 15,000 62,000 478,000 244,000 722,000 44,000

From the foregoing it would appear that compared with last year there is a decrease this year in the week's shipments from Bombay to all of Europe of 28,000 bales, and that the total movement since Jan. 1 shows a decrease in shipments of 11,000 bales compared with the corresponding period of 1872.

compared with the corresponding period of 1872.

GUNNY BAGS, BAGGING,&c.—The bagging market has been quiet and steady at 13½c. for rells, with more inquiry for bales, which are held at 10c., currency, cash. We hear of no sales the last tew days, though we hear of several inquiries in the market. Bags quiet and no sales reported. We quote at 14½c. For butts the market has ruled quiet and weaker, and the reduced prices have led to some sales. To sum up the reported transactions from June 1 to date are about as follows: 2,100 bales at 1½@2c., time; 1,700 bales, 1½c., cash and time; 1,800 bales, 1½c., cash, and less discount cash; 2,000 bales, to arrive, 1½c., c. o. d.; 1,500 bales, 1½c., prompt cash; being a tetal of 9,100 bales. We quote closing prices at 1½@1½c., cash, and indications are that free arrivals and pressure to sell would further depress prices. pressure to sell would further depress prices.

VISIBLE SUPPLY OF COTTON AS MADE UP BY CABLE AND TELE-GRAPH.—Below we give our table of visible supply, as made up by cable and telegraph to night. The continental stocks and affoat are the figures of last Saturday, but the other totals are this week's returns

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per latest mail returns, have reached 49,189 sales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in The Chronicle last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests of all vessels cleared up to Wednesday night of this week :

Below we give all news received, during the week, of disasters to vessels carrying cotton from any port of the United Statea:

to vessels carrying cotton from any port of the United States:

A Bunnno Vessel. of about 2,000 tons, apparently American, cotton laden, forepart hurnt away, fire then in after hold, cables hanging over bows, no one seen on hoard, was sighted April 30, in lat 37 N., lon 42 W.

A Bale of Cotton, apparently American, without marks, was picked np May 19, in lat 47 to 48 N., lon 18 W.

Imperator (Nor), at Revai May 17th, from New Orleans, grounded while leaving the latter port in tow, and remained for about 24 hours; it is supposed that her copper sheathing was injured, as pieces of her falze keef were seen coming up, but the vessel remained tight.

Monteacle Part of the cargo (cotton) saved from the ship Monteagle (Br), from New Orleans for Bremen, wrecked on the Bahamaa Jan. 13, was shipped on board the bark Alida (Nor.), which sailed from Nassan May 23, for Bremen.

Varuna (Br.)—Salvora in the case of the ship Varona, from New York for Liverpool, taken into St. Thomas, derelict, have been paid £5,000. The vessel will be temporarlly repaired and sail for Liverpool.

# BREADSTUFFS.

FRIDAY P. M., June 13, 1873.

The flour market has shown a further decline in prices of all grades during the past week. The receipts have been but moderate, and the demand very fair, not only from shippers to the West Indies, to Great Britain, and to the British Provinces, but the local trade has been in want of stocks, and have purchased to meet their requirements; but the pressure to sell has been very decided; some holders have been apprehensive that some lots might sour, and there has appeared, from the course of the wheat market, but little inducement to carry stock. Under such circumstances, more or less decline has naturally taken place. Superfine flours have yielded most, selling as low as \$5 10, and the best going at \$5 50, but showing rather more steadiness at the close. On Monday and Tuesday some 12,000@15,000 bbls. good spring extras (round hoop Western and extra State) sold at \$6 75@\$6 90, most for arrival; but yesterday 2,000 bbls. of the same grades sold at \$6 60@\$6 75. Rye flour has also been depressed; but corn meal has been in demand, and yesterday 600 bbls. Brandywine sold at \$3 65. To day 2,000 bbls. extra State sold at \$5 65@\$6 75, delivered, and the market was generally depressed and unsettled.

Wheat has shown a firmer feeling, not, however, without some irregularity, and closing with the loss of the improvement which took place early in the week. There was some decline in ocean freighfs, and foreign advices were favorable, upon which there were sales on Tuesday as high as \$1 58 for No. 2 Milwaukee, and \$1 55@\$1 56 for No. 2 Chicago and Northwestern, with No. 1 Milwaukee at \$1 65, and No. 3 spring at \$1 47@\$1 50, with No. 2 Milwaukee sold for the last half of June and the first of July at \$1 56, But there was a prompt reaction, and yesterday, under large receipts, lower gold, and a recovery in ocean freights to the highest rates of the season, No. 2 spring sold at \$1 53@ \$1 53\frac{1}{2} for Milwaukee, \$1 50 for Northwest, and \$1 48@\$1 49 for Chicago. Winter wheats have been quiet. Receipts of wheat at the Western markets have been larger than last season, and the visible supply is materially increased. To-day there was a further decline and more activity, some twelve or fifteen boat loads of No. 3 Milwaukee having been sold for export at

Indian corn has been gaining strength until yesterday, when nn advance in ocean freights and a decline in gold, together with some increase in the supplies, checked the upward tendency, and pretty free sales of Western mixed, received by canal, were made at 55@57c, with small lots by rail at 62c and prime yellow 65@66c, with old mixed held at 67@68c affoat. The receipts of corn at at the Western markets have somewhat increased, but were last week only little more than half as large as for the corre spon

week last year, and the visible supply shows a considerable fall ing off. To-day, at about 2c decline, there was a fair degree of activity, including new canar mixed at 52@56c, and old do. at 65c; prime steamer mixed sold at 55c.

In rye there has been some revival of the demand from the Continent, with a few cargoes sold at 94c for Western and Canadian, the latter in bond. A boat load of Canada pers sold at 90c in bond affoat.

Oats have been in greatly increased supply, and have material. ly declined. Yesterday prices were so unsettled that accurate quotations could not be given. To day there was more steadiness: 42 c bid for boat-loads of No. 2 Chicago and 45c asked, but probably 44c would buy,

The following are closing quotations:
